The Carmelites' role as one of the four great mendicant orders was not unchallenged. Originating as an association of hermits on Mount Carmel, the order experienced a dramatic transformation in the thirteenth century while its name was a reminder to origins which were obscure and its first form of religious life was diametrically opposed to the mendicant ministry. In addition the 'White Friars' were unable to find legitimization in a charismatic founder figure, unlike the Franciscans and the Dominicans. These factors led the Carmelites to create an identity finding their roots with the prophets Elijah and Elisha, who appear in texts and were represented in altar pieces and other works of art. The ten articles published in this volume address these underlying issues and deal with the order's historiography as well as its regional representation in different phases of its history. The authors are historians and art historians—some of them members of the Carmelite community—who are working as academics and specialise in the comparative history of religious orders. For many decades, the LGBTQ+ community has been plagued by strife and human rights violations. Members of the LGBTQ+ community were often denied a right to marriage, healthcare, and in some parts of the world, a right to life. While these struggles are steadily improving in recent years, disparities and discrimination still remain from the workplace to the healthcare that this community receives. There is still much that needs to be done globally to achieve inclusivity and equity for the LGBTQ+ community. The Research Anthology on Inclusivity and Equity for the LGBTQ+ Community is a comprehensive compendium that analyzes the struggles and accomplishments of the LGBTQ+ community with a focus on the current climate around the world and the continued impact to these individuals. Multiple settings are discussed within this dynamic anthology such as education, healthcare, online communities, and more. Covering topics such as gender, homophobia, and queer theory, this text is essential for scholars of gender theory, faculty of both K-12 and higher education, professors, pre-service teachers, students, human rights activists, community leaders, policymakers, researchers, and academicians.

leaves bamboo plants have also been liked by many herbivore animals, such as, elephants, the wild cattle, Indian Bison, and some species of deer. The red-panda in the Himalayas, and primates, pigs, rats and mice, porcupines, and squirrels are also incidental feeders on southeast Asian bamboos. There has been a growing awareness in recent years about the values of bamboo being an important means of economic growth and for improving the socio-economic conditions of the rural poor. Bamboo as an industrial material can substitute wood and that to at low cost. Due to increasing demand and squeezing of bamboo area the plants have been overexploited and the quality and quantity of resource alarmingly getting depleted. Besides many new bamboo based industries have come up which also urgently require uninterrupted supply of species wise bamboo resource. The south Asia region has bestowed with more than 300 bamboo species with enormous diversities at species, ecological and genetical level. A number of bamboo species are found common among countries of the region selected for various utilization potentials having wide range of ability to adjust environmental conditions of these countries and thus prioritized for cultivation. Both government and private planters in the region have started allocating funds, land and other logistics to raise large scale plantation of desired bamboo species. This book has been drafted to find out answers of the most pertinent queries based on the field observations on each of the bamboo species and knowledge learnt from the indigenous people living with bamboos in different parts of south-east and south Asian countries. This monograph would be interesting and useful to bamboo professionals, foresters, horticulturists, field level extension workers, nurserymen, planters, industrial entrepreneurs, ecologists, and valuable source of reference to the relevant researchers and students in the region.
