This anthology demonstrates the richness and diversity of the American intellectual heritage. In it we see how Jonathan Edwards grapples with the problem of how to reconcile freedom and responsibility with Calvinist religious beliefs; how Franklin and Jefferson exemplified American enlightenment thought; and how the Transcendentalists, Ralph Waldo Emerson and Henry David Thoreau, formulated their particular romantic idealist beliefs. A second and significant portion of the anthology is devoted to Pragmatism. Substantive excerpts from Peirce, James and Dewey, as well as Royce, are collected here. A third part is devoted to other Twentieth-Century American philosophies. No other collection of writings in this field includes the breadth of coverage that this one does. Among the chapters in this third part of the book are those on early Process Philosophy, Phenomenology, Positivism, and Language Philosophies. Selections from such philosophers as Whitehead, Weiss, Buchler, Gurwitsch, Sellars, Quine, Davidson, and Rawls, along with many others are included in this part. A final chapter is devoted to twentieth-century American Moral Philosophy. The book is specifically designed to be used as a text for courses in American philosophy. A substantive introduction that emphasizes the historical setting as

More than any other author of the Modern period of American literature, John Steinbeck evidenced a serious interest and background in moral philosophy. His personal reading collection included works ranging from Kant and Spinoza to Taoism and the Bible.

Critics also consistently identify Steinbeck as an author whose work promotes serious moral reflection and whose characters undergo profound moral growth. Yet to date there has been no sustained examination of either John Steinbeck's personal moral philosophy or the ethical features and content of his major works. This critical neglect is remedied by a collection of highly readable essays exploring the philosophy and work of one of America's few Nobel Prize winning authors. These thirteen essays, written by experts both within philosophy and Steinbeck studies, examine almost all of Steinbeck's major works. Included in the compilation are five general essays examining Steinbeck's own moral philosophy and eight specific essays analyzing the ethics of various major works.

Developed in response to a high level of customer demand, the workbooks in this series provide an innovative new approach to revision with a range of tasks and answers for students to test and track their writing skills in advance of the exam. Each workbook contains sections to be filled in by the reader.

Too much emotion and insufficient fact. This paradox has long characterized the controversy surrounding animal research. *Of Mice, Models, and Men* is the first exhaustive treatment of all areas--empirical and conceptual--relevant to the use of animals in research. It is also the first study to combine regard for the welfare of laboratory animals with a knowledgeable acceptance of the continuing need for research involving animals. The book has another rare quality. It is virtually devoid of any of the emotional and exaggerated attacks that have characterized many of the other publications in this area. Instead, it presents, in a manner accessible to both sides, all the relevant historical, social, and scientific information required to form an opinion on the subject. The book thus achieves a most difficult goal--that of bridging the gap between researchers using animals and animal welfare advocates, while pointing

out the need for a more active program to promote laboratory animal welfare. Critical Literacy as Resistance is a collaborate effort among secondary and university educators from across the United States that addresses questions such as: What does a critical literacy classroom look like? What various texts are used? What strategies do teachers use to encourage students and teacher candidates to recognize how texts construct power and privilege? How do educators inspire activism in and out of the classroom? This book documents the experiences of scholars and teachers who have successfully bridged theory and practice by applying critical literacy into their respective content areas. The authors spell out the difference between critical thinking and critical literacy, then show how to write and implement curriculum that incorporates diverse texts and multiple literacies in all content areas (including world language), and includes the voices of students as they confront issues of race, class, gender, and power. The principles and practices laid out here will help teachers use literacy to liberate and empower students both in and outside the classroom by respecting and studying the literacies students bring to school, while simultaneously teaching (and challenging) the literacies of those in power. This is a book for pre- and in-service teachers in all content areas, staff developers, secondary literacy specialists, university professors, and anyone interested in social justice.
