Work more effectively and gauge your progress along the way! This Study Guide is designed to accompany Shapiro's Foundations of Multinational Financial Management, 5th Edition. It contains detailed chapter outlines and a number of solved questions and problems. Now updated and reorganized, Alan Shapiro's Foundations of Multinational Financial Management, 5th Edition, emphasizes broad concepts and practices, and provides a clear conceptual framework for analyzing key financial decisions in multinational firms. The text treats international financial management as a natural and logical extension of the principles learned in the foundations course in financial management. Thus, it builds on and extends the valuation framework provided by domestic corporate finance to account for dimensions unique to international finance.

This collection of readings provides a solid grounding in the major practical business decisions that students and managers face in a global setting. The organization of the reader emphasizes general patterns of trade and investment flows, while examining in depth - the reasons for the internationalization of firms and the international dimension of various functional areas, including finance, accounting, marketing, and production. In six sections the readings take up changes in international ownership patterns, corporate strategy, international marketing issues, the basic financial decisions and taxation issues for a multinational firm, and political risk. Each section includes an introduction that outlines the basic ideas to be discussed, as well as questions, key terms, and suggestions for further reading. Robert Z. Aliber is Professor of International Economics and Finance at the Graduate School of Business at the University of Chicago. Reid W. Click is Assistant Professor of Economics in the Lemberg Program in International Economics and Finance at Brandeis University.

The eleventh edition of Multinational Financial Management is a comprehensive survey of the essential areas of the international financial market environment, including foreign exchange and derivative markets, risk management, and international capital markets and portfolio investment. Designed for upper-level undergraduate and masters-level courses in international finance and management, this textbook offers readers a conceptual framework for analyzing key financial decisions of multinational firms. The authors both explain and simplify multinational financial management by illustrating how its basic principles share the same foundation as domestic corporate finance.

Assuming no prior knowledge of international economics or finance, this substantially revised new edition builds upon the fundamental principles of domestic financial management to examine the unique dimensions of international finance. Readers are presented with a solid theoretical knowledgebase for examining decision problems, as well as practical analytical techniques that clarify the often-ambiguous guidelines used by international financial executives. All the traditional areas of corporate finance are explored from the perspective of a multinational corporation, focusing on elements rarely encountered in domestic finance such as multiple currencies, segmented capital markets, and political risks of nationalization or expropriation.

The most complete book on this subject available on the market, Capital Budgeting blends theory with practice by providing numerous real-world examples of its applications. It includes a discussion of capital budgeting's link to the corporate strategy for creating value as well as addresses the international aspects of capital budgeting. After a comprehensive introduction to the subject, this book covers capital budgeting principles and techniques; estimating project cash flows; biases in cash flow estimates; foreign investment analysis; real options and project analysis; risk and incorporating risk in a capital budgeting analysis; estimating project cost; financing side effects; discount rates for foreign investments; and corporate strategy and the capital budgeting decision. An excellent handbook for chief financial officers, vice-presidents of finance; treasurers; and comptrollers.

As more businesses in today's economy are moving towards a global reach, it is essential for finance students to understand how the fundamentals of corporate finance relate to multinational firms. Shapiro's Multinational Financial Management 9th Edition provides that conceptual framework within which key financial decisions of a multinational firm can be analyzed. The author's comprehensive approach is to treat international financial management as a natural extension of the principles learned in the first course in financial management. The book builds its coverage of international finance on the framework of valuation established by domestic corporate finance. It can be used in courses in International Financial Management and International Finance at the upper-level undergraduate or MBA level.
