The emergence of severe acute respiratory syndrome (SARS) in late 2002 and 2003 challenged the global public health community to confront a novel epidemic that spread rapidly from its origins in southern China until it had reached more than 25 other countries within a matter of months. In addition to the number of patients infected with the SARS virus, the disease had profound economic and political repercussions in many of the affected regions. Recent reports of isolated new SARS cases and a fear that the disease could reemerge and spread have put public health officials on high alert for any indications of possible new outbreaks. This report examines the response to SARS by public health systems in individual countries, the biology of the SARS coronavirus and related coronaviruses in animals, the economic and political fallout of the SARS epidemic, quarantine law and other public health measures that apply to combating infectious diseases, and the role of international organizations and scientific cooperation in halting the spread of SARS. The report provides an illuminating survey of findings from the epidemic, along with an assessment of what might be needed in order to contain any future outbreaks of SARS or other emerging infections.

Walking around New York City was what Mitty Blake did best. He loved the city,

and even after 9/11, he always felt safe. Mitty was a carefree guy—he didn't worry about terrorists or blackouts or grades or anything, which is why he was late getting started on his Advanced Bio report. Mitty does feel a little pressure to hand something in—if he doesn't, he'll be switched out of Advanced Bio, which would be unfortunate since Olivia's in Advanced Bio. So he considers it good luck when he finds some old medical books in his family's weekend house that focus on something he could write about. But when he discovers an old envelope with two scabs in one of the books, the report is no longer about the grade—it's about life and death. His own. This edge-of-your-seat thriller will leave you breathless.

Still dazzling and transgressive, this groundbreaking novel remains a frightening fable on morality and the meaning of human freedom.

The New York Times bestselling true story of an all-American girl and a boy from Zimbabwe -- and the letter that changed both of their lives forever. It started as an assignment. Everyone in Caitlin's class wrote to an unknown student somewhere in a distant place. Martin was lucky to even receive a pen-pal letter. There were only ten letters, and fifty kids in his class. But he was the top student, so he got the first one. That letter was the beginning of a correspondence that spanned six years and changed two lives. In this compelling dual memoir, Caitlin and Martin recount how they became best friends--and better people--through their long-distance exchange. Their story will inspire you to look beyond your own life and wonder about the world at large and your place in it.

Have you ever wanted, or even tried to change your own behaviour or the behaviour of other people? No doubt the answer is yes. Have your attempts at behaviour change been successful in the short-term as well as the long-term? All too frequently the answer is no. Our society is filled with an array of behaviour change strategies that all fall under the category of management, relief and solution-based strategies; and herein lays the error. It is these strategies that are failing our society as a whole as at the very best, they offer short-term behaviour change, but rarely LASTING change. When observing what is going on on a daily basis, you will see behaviour challenges in the areas of education, mental health, justice, disability and that society as a whole is getting worse. This does not make sense in a world where there are more resources than ever before ... unless of course, our current resources are not truly supporting. The Body Life Skills program embraces that lasting change is our way forward if we are to bring true change to the quality of the life of individuals, families, workplaces and society as

a whole. This third book in the Body Life Skills series introduces simple, practical and effective ways that will support lasting behaviour change in both a personal and professional capacity. This book offers a way forward to bring about: Lasting Behaviour Change

NATIONAL BESTSELLER • PEN/HEMINGWAY AWARD WINNER • One of The New York Times 10 Best Books of the Year • A wondrous and shattering novel that follows twelve characters from Native communities: all traveling to the Big Oakland Powwow, all connected to one another in ways they may not yet realize. Among them is Jacquie Red Feather, newly sober and trying to make it back to the family she left behind. Dene Oxendene, pulling his life together after his uncle's death and working at the powwow to honor his memory. Fourteen-year-old Orvil, coming to perform traditional dance for the very first time. Together, this chorus of voices tells of the plight of the urban Native American—grappling with a complex and painful history, with an inheritance of beauty and spirituality, with communion and sacrifice and heroism. Hailed as an instant classic, *There There* is at once poignant and unflinching, utterly contemporary and truly unforgettable. This book presents eight of the author's short stories. In "Bog Girl: A Romance," a story about first love, a young man falls in love with a two thousand year old girl that he's extracted from a mass of peat in a Northern European bog. In "The Prospectors," two opportunistic young women fleeing the Depression strike out for new territory, and find themselves fighting for their lives. In the title story, a new mother desperate to ensure her infant's safety strikes a diabolical deal, agreeing to breastfeed the devil in exchange for his protection. The landscape in which these stories unfold is a feral, slippery, purgatorial space, bracketed by the void - yet within it, the author captures the tenderness of ordinary life.--adapted from book jacket.
