

## Effective Public Relations 8th Edition

Directed primarily toward undergraduate marketing college/university majors, this text also provides practical content to current and aspiring industry professionals. Written by two of the most respected individuals in the field, *Public Relations Practices* presents timeless case studies to help future practitioners develop agility in the principles and applications of effective two-way communications likely to confront them and their employer.

This is a study of the Royal Bank of Canada's Monthly Letter, which was initially created in 1920 as a traditional economic newsletter and later evolved quite serendipitously into a publication marvel when, in 1943, it came under the influence of John Heron, journalist and publicist, gaining mass appeal both domestically and abroad. This concise history documents the inception, development and rise to popularity of the Monthly Letter, telling the untold story of how a corporate newsletter became a tool of international public diplomacy. The purpose of this writing is to demonstrate the entanglement of the fields of public diplomacy and public relations and to offer a more palatable conceptualization of them as two discrete, but necessary, parts of a whole. It acknowledges the varied soup of contested terminology which surrounds the field of public diplomacy (e.g. corporate diplomacy, cultural diplomacy and economic diplomacy). This work conceptualizes public diplomacy and public relations as two parts of a whole in which the sum is greater than its individual parts, juxtaposing the two fields in relation to one another, diminishing neither. The contents of this work provide a broad overview of the fields of public diplomacy and public relations that could serve as an introduction and discussion point for students and scholars in both fields and offers a specific case study around which lively discussion and additional study can ensue.

Non-profit organizations (NPOs) across the world are facing criticism alongside approbation. In order for NPOs to effectively support their causes, they require public trust. The editors of this book have persuaded PR experts from the UK and around the world, from a variety of PR specialisms operating across different organizational forms, to share their knowledge and experience. These contributions are scaffolded with authoritative academic and practical advice, as well as solutions. The book starts with foundations that underpin communications for causes. These include arguments that support the importance of non-profits in civil society; lessons in corporate governance; and a new approach to issues management. PR planning subjects tailored, or specific, to the sector include: strategic global communications planning, agile digital communications; branding internal communications and the securing of meaningful outcomes. Corporate partnerships are examined with a new 'Fit to Partner Test' and consideration of the mandated corporate social responsibility (CSR) in India, corporate volunteering in Brazil, and CSR in South Africa. Relations between governments and non-profits are also considered, both generally and with a particular focus on China. *Communicating Causes* looks at effective strategy and practice of PR in the modern non-profit. Including forewords by both John Grounds and Jon Snow, the expert perspectives offered in this book provide valuable support to current and future communicators.

The public relations landscape has changed dramatically from what it was in 1989, when the original Public Relations Theory volume was published. Reflecting the substantial shifts in the intervening years, Public Relations Theory II, while related to the first volume, is more a new work than a revision. Editors Carl H. Botan and Vincent Hazleton have brought together key theorists and scholars in public relations to articulate the current state of public relations theory, chronicling the ongoing evolution of public relations as a field of study. The contributors to this volume represent the key figures in the discipline, and their chapters articulate the significant advances in public relations theory and research. Working from

the position that public relations is a theoretically grounded and research based discipline with the potential to bring numerous areas of applied communication together, Botan and Hazleton have developed this volume to open up the public relations field to a broad variety of theories. Organized into two major sections--Foundations, and Tools for Tomorrow--the volume presents four types of chapters: discussions addressing how public relations should be understood and practiced; examinations of theories from other areas applied to public relations; explorations of theories about a specific area of public relations practice; and considerations of public relations theories and research that have not been given sufficient attention in the past or that hold particular promise for the future of public relations. It serves as a thorough overview of the current state of theory in public relations scholarship. Like its predecessor, *Public Relations Theory II* will be influential in the future development of public relations theory. Taken as a whole, the chapters in this book will help readers develop their own sense of direction for public relations theory. *Public Relations Theory II* is an essential addition to the library of every public relations scholar, and is appropriate for use in advanced public relations theory coursework as well as for study and reference.

*Public Relations Worktext* is a writing and planning resource for public relations students and practitioners.

Reputation management is the most important theme in public relations and corporate communication today. John Doorley and Helio Fred Garcia argue that most CEOs don't actually pay much heed to reputation and this is to their peril. This book is a how-to guide for professionals and students in public relations and corporate communication, as well as for CEOs and other leaders. It rests on the premise that reputation can be measured, monitored, and managed. Organized by corporate communication units (media relations, employee communication, government relations, and investor relations, for example), the book provides a field-tested guide to corporate reputation problems such as leaked memos, unfair treatment by the press, and negative rumors – and it is this rare book that focuses on practical solutions. Each chapter is fleshed out with real-world experience by the authors and their contributors who come from a wide range of professional corporate communication backgrounds. This new edition features new and updated examples throughout, two new chapters on social media and public relations consulting, a new textbox feature in each chapter relating key communication theories to the practice of public relations and corporate communication, expanded coverage of global issues, and a new Companion Website at: [www.routledge.com/textbooks/doorley](http://www.routledge.com/textbooks/doorley), featuring lecture materials for instructors and extensive learning resources for students and professionals.

Governments and corporations, nonprofits and special interest groups, all have spin doctors trying to turn the news to their advantage. This book examines how this shift came to be and explores the questions it raises about the role of media in a democratic society and the future of journalism.
