

## Famous Ocean Liners The Story Of Passenger Shipping From The Turn Of The Century To The Present Day

The story in words and pictures of the Floating Palaces, the transatlantic liners that were as much floating art as a means of transport.

In an engaging and anecdotal social history, Siân Evans's *Maiden Voyages* explores how women's lives were transformed by the Golden Age of ocean liner travel between Europe and North America. During the early twentieth century, transatlantic travel was the province of the great ocean liners. It was an extraordinary undertaking made by many women, whose lives were changed forever by their journeys between the Old World and the New. Some traveled for leisure, some for work; others to reinvent themselves or find new opportunities. They were celebrities, migrants and millionaires, refugees, aristocrats and crew members whose stories have mostly remained untold—until now. *Maiden Voyages* is a fascinating portrait of these women as they crossed the Atlantic. The ocean liner was a microcosm of contemporary society, divided by class: from the luxury of the upper deck, playground for the rich and famous, to the cramped conditions of steerage or third class travel. In first class you'll meet A-listers like Marlene Dietrich, Wallis Simpson, and Josephine Baker; the second class carried a new generation of professional and independent women, like pioneering interior designer Sibyl Colefax. Down in steerage, you'll follow the journey of émigré Maria Riffelmacher as she escapes poverty in Europe. Bustling between decks is a crew of female workers, including Violet "The Unsinkable Stewardess" Jessop, who survived the Titanic disaster. Entertaining and informative, *Maiden Voyages* captures the golden age of ocean liners through the stories of the women whose transatlantic journeys changed the shape of society on both sides of the globe.

Hauntings lurk and spirits linger in the *Old Line State Reader*, beware! Turn these pages and enter the world of the paranormal, where ghosts and ghouls alike creep just out of sight. Author Ed Okonowicz shines a light in the dark corners of Maryland and scares those spirits out of hiding in this thrilling collection. From footsteps and apparitions appearing at Fort McHenry, to reports of strange noises and phenomena at the battleground of Antietam, these stories of strange occurrences will keep you glued to the edge of your seat. Around the campfire or tucked away on a dark and stormy night, this big book of ghost stories is a hauntingly good read.

On October 20, 1910, RMS Olympic was launched at Belfast. She was the first of a trio of steamships constructed for the White Star Line and, when built, was the largest ship in the world.

Depicts five famous ships that have been lost at sea in modern times, the Empress of Ireland, the Lusitania, the Andrea Doria, the Britannic, and the Titanic.

The story of the world's fastest passenger liner, from Blue Riband winning maiden voyage to abandonment in Philadelphia and her possible restoration as the most famous ocean liner of the post-war period.

The second thrilling account of #1 New York Times bestselling author Clive Cussler's real-life search for lost ships, planes, and other marvels that changed history. For decades, Clive Cussler's real-life NUMA®, the National Underwater and Marine Agency, has scoured rivers and seas in search of lost ships of historic significance. His teams have been inundated by tidal waves and beset by obstacles—both human and natural—but the results, and the stories behind them, have been dramatic. In this follow-up to their bestselling first account, *The Sea Hunters*, Cussler and colleague Craig Dirgo provide another extraordinary narrative of their true seagoing—and land—adventures, including their searches for the famous ghost ship Mary Celeste, found floating off the Azores in 1874 with no one on board; the Carpathia, the ship

that rescued the Titanic survivors and was itself lost to U-boats six years later; and L'Oiseau Blanc, the airplane that almost beat The Spirit of St. Louis across the Atlantic before disappearing in the Maine woods. All these, plus steamboats, ironclads, a seventeenth century flagship, a certain famous PT boat, and even a dirigible, are tantalizing targets as Cussler proves again that truth can be "at least as fun, and sometimes stranger, than fiction" (Men's Journal).

This illustrated and colourful history charts the hey-day of the great liners, those grand and lavish vessels that cruised around the world carrying their glamorous passengers from port to port. Decorated to the highest of finishes, fitted out in the most luxurious of styles, these floating palaces epitomised their opulent age. Their iconic names, from Titanic to Mauretania, from Queen Elizabeth to QE2, conjure up visions of power, grace, elegance and nostalgia for this golden age of travel. Written by maritime and cruise liner expert William Miller, and accompanied by stunning photographs, artworks, Did You Know facts and quotations, The Great Liners Story is a must-have addition to any maritime library.

"The golden age of ocean liners tells the remarkable story of the international competition to build the world's fastest, largest, and most luxurious ships, and captures in 97 vivid illustrations the glamour of this extraordinary era"--Cover.

Presents alphabetical articles on major events, documents, persons, social movements, and political and social concepts connected with the Gilded Age and the Progressive Era.

Designing Liners: A History of Interior Design Afloat covers the interior design of these floating palaces from the mid-nineteenth century to the twenty-first century. In this new edition, the design heritage of the ocean liner is also explored in this age of a growing holiday cruise market. The book offers the first history and analysis of this highly significant aspect of the design of interiors, which mirrors and reinforces cultural assumptions about national identity, gender, class and ethnicity. The interiors of ocean liners reflect the changing hierarchies of society and shifting patterns of globalization. The trajectory of the professionalization of interior design is the connecting narrative of the book, from the local decorating firm to the internationally renowned architect. It is an important addition to interior design research and takes this transitory building type as its subject. This book provides the first survey of the transient history of interior design in relation to the development of passenger shipping. The history of these great ship interiors is tracked, from their commissioning by the line owners; the materials, methods and sources for the initial creation; their construction; their use and reception. The demise and re-purposing of the interiors is also covered in this new edition, with additional material on the South African Union Castle and P & O lines. Drawing on a broad range of original research, Anne Massey's approach combines interior design studies, design history, architectural history and maritime studies. The new edition has been carefully designed to include black and white and colour illustrations.

Looks at the history of ocean liners, tells the stories of individual ships, and describes the impact of two world wars on liner service

Perhaps it is because everything about the Titanic was absolutely gigantic. To this day, it is difficult to comprehend the impact of its sheer size. In the year 1910, a resident of Belfast provided a haunting image of the giant luxury liner under construction that reinforces the wonder of it all ... Book jacket.

This fascinating text-and-picture tribute documents both interiors and exteriors of majestic British ships such as the Viceroy of India, the Orion, Queen Mary, Queen Elizabeth, Windsor Castle, Pacific Princess, Royal Princess, Crown Princess, and Aurora. Over 200 rare black-and-white illustrations provide views of the ships at sea and in port.

This original and "meticulously researched retelling of history's most infamous voyage" (Denise Kiernan, New York Times bestselling author) uses the sinking of the Titanic as a prism through which to examine the end of the Edwardian era and the seismic shift modernity

brought to the Western world. "While there are many Titanic books, this is one readers will consider a favorite" (Voyage). In April 1912, six notable people were among those privileged to experience the height of luxury—first class passage on "the ship of dreams," the RMS Titanic: Lucy Leslie, Countess of Rothes; son of the British Empire Tommy Andrews; American captain of industry John Thayer and his son Jack; Jewish-American immigrant Ida Straus; and American model and movie star Dorothy Gibson. Within a week of setting sail, they were all caught up in the horrifying disaster of the Titanic's sinking, one of the biggest news stories of the century. Today, we can see their stories and the Titanic's voyage as the beginning of the end of the established hierarchy of the Edwardian era. Writing in his signature elegant prose and using previously unpublished sources, deck plans, journal entries, and surviving artifacts, Gareth Russell peers through the portholes of these first-class travelers to immerse us in a time of unprecedented change in British and American history. Through their intertwining lives, he examines social, technological, political, and economic forces such as the nuances of the British class system, the explosion of competition in the shipping trade, the birth of the movie industry, the Irish Home Rule Crisis, and the Jewish-American immigrant experience while also recounting their intimate stories of bravery, tragedy, and selflessness. Lavishly illustrated with color and black and white photographs, this is "a beautiful requiem" (The Wall Street Journal) in which "readers get the story of this particular floating Tower of Babel in riveting detail, and with all the wider context they could want" (Christian Science Monitor).

Traces the history, development, and culture of the biggest ships on earth, including England's Britannia, Holland's Statendam, and the most famous of ocean liners, the Titanic, and how they changed history.

This exquisitely illustrated story of quiet bravery tells in rich detail how the little ship Carpathia saved 705 passengers of the Titanic from the icy waters of the North Atlantic. With the approaching 110-year anniversary of the ship's sinking, Rescuing Titanic shares a unique connection with the story of the ship; having been written and illustrated by debut Northern Irish artist, Flora Delargy, whose grandfather and great grandfather both worked in the Belfast Shipyards where the Titanic was built. In the middle of the night, the Carpathia received a distress call from the sinking Titanic. The intrepid little ship heroically changed course and headed straight into the frozen sea to help save as many people as it could. Follow the Carpathia as it risks everything to navigate remote, treacherous ice fields in the dark and come to the rescue of passengers on the world-famous ocean liner. Along the journey, you will learn all about Morse code, navigation tools, the different roles of the crew, how the ships found each other, and by-the-minute details of exactly what happened on this cold and fateful night. The illustrations set the scene and take the reader into the frozen eerie night in the North Atlantic. Beautiful full-bleed illustration and vignettes give great detail about how everyone on the ship made their own contribution and showed true bravery. Rescuing Titanic shows that a glimmer of hope can be found even in great tragedy and that heroes are not always big and mighty, but can also be small and unassuming. This is the debut book in the Hidden Histories series, which explores with beautiful illustrations and vivid details the untold parts of stories we thought we knew.

Forty-five magnificent ready-to-color illustrations depict USS Constitution, sloops, whalers, frigates, clippers, more. Informative captions.

The illustrated history of the most famous ocean liner afloat today.

Conceived in 1907, Titanic was two years in design and 37 months in construction at the great Harland and Wolff shipyard in Belfast, Northern Ireland. She was the biggest ship the world had ever seen, and thought by many to be indestructible. But she sank just five days into her maiden voyage, en route to New York in 1912. Some 1500 people died. This book, takes the story of the ship right back to the beginning, to the decision to build it in the first place. From there we go into the shipyard, where 4,000 tradesmen - joiners, fitters, electricians, plumbers, welders, riveters and many more - rivet by rivet, plate by plate, turned those plans and blueprints into a towering hulk of an ocean liner. Once the outer shell was complete, the luxurious passenger accommodation was fitted out, the dining rooms, the squash court, gymnasium, libraries, smoking rooms and even Turkish baths. The men that built her knew every bolt and rivet, every dove-tail joint, every new-fangled piece of kit, every vibration of the engine. For them, Titanic would always be the world's greatest ship. This is an extraordinary story of modern engineering and also of human endeavour and, ultimately, fallibility. photographs of the Titanic in construction, Building the Titanic adds a fascinating dimension to the history of the world's most famous ship.

This fascinating book provides a unique record of the careers and final underwater resting places of ships of the Cunard Line, whose rich history spans over 300 ships and nearly two centuries. Many books have been published on Cunard's heritage but the final fate of these ships is often little more than a footnote of history. Authors Sam Warwick and Mike Roussel have taken the shipwrecks as a starting point to create a vivid new history. Featured vessels include the well-known Caronia, Lancastria, Campania, Lusitania, Malta, Oregon, Scotia and Carpathia, famous for rescuing the survivors from the Titanic, as well as many others. Events surrounding the wrecking of each vessel are thoroughly explored and unique diver accounts are incorporated, along with never-before-seen underwater images of the wrecks. Finishing off with practical data for interested divers, this book offers a fresh analysis of Cunard's maritime history. Profusely illustrated with color illustrations

In the tradition of Erik Larson's *Dead Wake* comes *The Last Voyage of the Andrea Doria*, about the sinking of the glamorous Italian ocean liner, including never-before-seen photos of the wreck today. In 1956, a stunned world watched as the famous Italian ocean liner Andrea Doria sank after being struck by a Swedish vessel off the coast of Nantucket. Unlike the tragedy of the Titanic, this sinking played out in real time across radios and televisions, the first disaster of the modern age. Audiences witnessed everything that ensued after the unthinkable collision of two modern vessels equipped with radar: perilous hours of uncertainty; the heroic rescue of passengers; and the final gasp as the pride of the Italian fleet slipped beneath the Atlantic, taking some fifty lives with her. Her loss signaled the end of the golden age of ocean liner travel. Now, Greg King and Penny Wilson offer a fresh look at this legendary liner and her tragic fate. Andrea

Doria represented the romance of travel, the possibility of new lives in the new world, and the glamour of 1950s art, culture, and life. Set against a glorious backdrop of celebrity and La Dolce Vita, Andrea Doria's last voyage comes vividly to life in a narrative tightly focused on her passengers – Cary Grant's wife; Philadelphia's flamboyant mayor; the heiress to the Marshall Field fortune; and many brave Italian emigrants – who found themselves plunged into a desperate struggle to survive. The Last Voyage of the Andrea Doria follows the effect this trauma had on their lives, and brings the story up-to-date with the latest expeditions to the wreck. Drawing on in-depth research, interviews with survivors, and never-before-seen photos of the wreck as it is today, The Last Voyage of the Andrea Doria is a vibrant story of fatal errors, shattered lives, and the triumph of the human spirit.

The years between 1870 and 1940 are often considered a 'golden age' of travel: as larger and evermore sumptuous ships and trains were built, including the Orient Express, Blue Train, Lusitania and Normandie, journeying abroad became, and remains today, synonymous with chic, splendour and luxury. Utilising women's diaries and letters, art, advertising, fiction and etiquette guides, this book considers the journey's impact upon understandings of female identity, definitions of femininity, modernity, glamour, class, travel, tourism, leisure and sexual opportunity and threat during this period. It explores women's relationship with train and ship technology; cultural understandings of the journey; public expectations of women journeyers; how women journeyed in practice: their use of journey space, sociability with both Western and 'Other' non-Western journeyers, experience of love, sex and danger during the journey; and how women fashioned a journeyer identity which fused their existing domestic identities with new journey identities such as the journey chronicler. The journey is revealed to be an experience of sociability as much as mobility, dominated by ideas of respectability and reputation, class, power, vision and observation and home as well as the foreign and new.

A guide through the many publications on 20th-century British history, this reference contains over 27,000 entries arranged by theme, with introductions to each chapter. This in-depth history of the interior design of ocean liners surveys the transient history of interior design in relation to the development of passenger shipping, from commissioning by the line owners, methods and sources for the original creation of designs through to its construction, use and influence. It is a short-lived branch of architecture and design, lasting an average of fifteen years. As the design and taste mirrors and reinforces cultural assumptions about national identity, gender, class and race, not only did the interiors of ocean going liners reflect the changing hierarchies of society and shifting patterns in globalization, but the glamour and styling of the liners were reflected back into the design of interiors on land. Combining design history, architecture history, material and visual cultures, Designing Liners is a richly multidisciplinary work for those studying or researching this application of interior design.

The following is the list of 39 Stories: Almost But Lost A Priest Asked His Bishop Amy

From an ancient funeral ship to the Rainbow Warrior -- war, trade, science and pleasure on the open seas.

The story of the short-lived Liverpool shipping line, whose ships were some of the most luxurious afloat, and which included the Titanic, Olympic and Britannic.

Tells the true story of the sinking of the S.S. Titanic

A profusely illustrated history of the Titanic and her sisters as well as the competition from Cunard and Hamburg-Amerika Line.

In 1939, nine-year-old Paul goes on a memorable five-day voyage from New York to France on the luxurious ocean liner Normandie, the biggest ship in the world.

Maiden VoyagesMagnificent Ocean Liners and the Women Who Traveled and Worked Aboard ThemSt. Martin's Press

At the time of her completion she was the largest and most luxurious liner ever built, and her tragic demise on her maiden voyage still stands as the worst peacetime sea disaster in history. The loss of the Titanic had a deep impact on the public psyche on both sides of the Atlantic and our fascination with her continues unabated into a new century. So much has been written about Titanic - and indeed portrayed in major motion pictures - that it has become difficult to separate fact from fiction. This book addresses this issue, by posing the 101 most crucial questions about the liner, from design, construction and machinery to the dramatic events of that fateful April night, and provides concise and accurate answers to each one. How much steel went into her construction? Who made the decision to call her Titanic? Why was she described as 'unsinkable'? Why were there not enough lifeboats? How many people were on board? Where were the watertight compartments? The result is a thoroughly engaging and informative book that is sure to appeal to anyone with a general interest in maritime matters and the great ocean liners, as well as Titanic enthusiasts. Other titles in the series include Nelson's Victory, RMS Queen Mary, and Captain Cook's Endeavour. As war engulfs Europe, 1,500 passengers risk everything to find a brighter future. Cousins Masha and Rachel Morgenstern board the luxury liner the SS Manhattan bound for New York, desperate to escape the concentration camps that claimed the rest of their family. America offers a safe haven, but to reach it they must survive a hazardous Atlantic crossing. Among their fellow passengers fleeing the war, each with their own conflicts, secrets and surprises, are the composer Igor Stravinsky, making a new start after a decade of tragedy, and Rose Kennedy, determined to keep her four children from harm. Particularly worrying to Rose is her daughter Rosemary, a vivacious but troubled woman whose love for a Californian musician may derail her
