Learn how with Pro Freeware and Open Source Solutions for Business today.

The all-in-one guide to buying, using, securing, and transporting a laptop—it's ten books in one! If you want to take a computer with you on a trip, to a coffee shop, or into the kitchen when you're cooking, laptops are just the ticket. They're portable, powerful, and popular—but they're not desktops, so you'll want to know what you're doing from the get-go. This terrific, ten-minibooks-in-one book covers all the bases: how to choose the best laptop for you, what you need to know when you're on the road, how to get more productive and more. Shows you how to keep your laptop running smoothly and safely at home, at work, in the classroom, and on the road Includes ten books in one: Choosing the Best Laptop, Setting Up Your Laptop, Running Basic Windows Operations, Using Common Applications, Playing with Multimedia, Managing Your Power Supply, Upgrading Your Laptop, Networking and Linking to the Internet, Protecting Your Laptop, and Troubleshooting Common Problems Offers advice and tips on using your laptop safely and efficiently, including what accessories you need Reflects the very latest technologies, including Windows 7 and the new Microsoft Office 2010 This easy-to-follow For Dummies guide tells you everything you need to know about laptops!

PCMag.com is a leading authority on technology, delivering Labs-based, independent reviews of the latest products and services. Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology.

The 1982 statistics on the use of family planning and infertility services presented in this report are preliminary results from Cycle III of the National Survey of Family Growth (NSFG), conducted by the National Center for Health Statistics. Data were collected through personal interviews with a multistage area probability sample of 7969 women aged 15-44. A detailed series of questions was asked to obtain relatively complete estimates of the extent and type of family planning services received. Statistics on family planning services are limited to women who were able to conceive 3 years before the interview date. Overall, 79% of currently married nonsterile women reported using some type of family planning service during the previous 3 years. There were no statistically significant differences between white (79%), black (75%) or Hispanic (77%) wives, or between the 2 income groups. The 1982 survey questions were more comprehensive than those of earlier cycles of the survey. The annual rate of visits for family planning services in 1982 was 1077 visits /1000 women. Teenagers had the highest annual visit rate (1581/1000) of any age group for all sources of family planning services combined. Visit rates declined sharply with age from 1447 at ages 15-24 to 479 at ages 35-44. Similar declines with age also were found in the visit rates for white and black women separately. Nevertheless, the annual visit rate for black women (1334/1000) was significantly higher than that for white women (1033). The highest overall visit rate was for black women 15-19 years of age (1867/1000). Nearly 2/3 of all family planning visits were to private medical sources. Teenagers of all races had higher family planning service visit rates to clinics than to private medical sources, as did black women age 15-24. White women age 20 and older had higher visit rates to private medical services than to clinics. Never married women had higher visit rates to clinics than currently or formerly married women. Data were also collected in 1982 on use of medical services for infertility by women who had difficulty in conceiving or carrying a pregnancy to term. About 1 million ever married women had 1 or more infertility visits in the 12 months before the interview. During the 3 years before interview, about 1.9 million women had infertility visits. For all ever married women, as well as for white and black women separately, infertility services were more likely to be secured from private medical sources than from clinics. The survey design, reliability of the estimates and the terms used are explained in the technical notes.

Chances are, you wanted a laptop because it's compact, portable, and gets the job done. You'll want this book for the same reasons. Small enough to fit into your laptop case, it gives you what you need to make the most of your laptop—even if it's your first computer.
