One reason I wrote this training book is because I want to share with you the experiences and best lessons learned in my network marketing and internet marketing career, and hopefully it helps you in doing your business successfully. In this book, I'll give you some of the best kept secret strategies of top internet network marketers that I've discovered and learned. I'll give you an outline of the exact formula I use to build successful internet network marketing and home based business using the internet and new tools with internet technologies. These strategies that I am going to share with you are very helpful in order for you to generate 10-50 leads (or qualified prospects) daily and can recruit up to 10 direct downlines per week, as long as I do not force my friends, relatives, and acquaintances convince them for my business, nor do I give flyers to people I know in the streets. I will provide you with EXACT strategies that you will learn how to leverage and power the Internet so you can create qualified prospects continuously and eventually sponsor them in your network marketing business or convert them into customers. Do you know that you are advantage than your competitors because of the new skills and strategies you will learn in this training book that 99% of all networkers do not know yet. We have many things to say but all of us are focusing on the reality that our industry has grown significantly since the internet has come. The old and traditional ways of MLM and network marketing prospecting are not as effective as ever, and most of them are already obsolete. Most traditional tactics are just tiresome, activities that are not productive and cannot give a clear result. But the good news in this E-book is to have many new ideas to learn that you can apply your network marketing or home-based business. Ideas that you can help make you a successful in your business. If you try to promote your business in a traditional way but do not work for you, don't worry, because there are new and effective ways and strategies to build your MLM business more faster in our generation today. You can also start with networking, and it's better to do so by introducing you to effective strategies that you can apply and use immediately. Here's good news... The strategies I teach you will be much easier and more enjoyable compared to the traditional way of building a MLM business where we were taught to invite and treat nicely our relatives, Friends and acquaintances who are often not interested in the MLM business you are in. If you're like me, you'll probably also be able to give away flyers on the road and make fun of people you do not know for your opportunity. If you're doing these things, just a friendly advice, But stop it. Because base on my experiences and the many network marketers that have been talking with and friends, these cheap strategies are no longer effective. One of the reasons why many do not want networking is because of prospecting methods' too. They do not want to do such things.

Small Changes Make The BIGGEST Impact! There are many people who have tried to build their network marketing business with a website

or a blog but they have yet to achieve success. They make a lot of mistakes because they do not understand the principles. Did you know that there are many little things that you can do to your website, blog, sales letter or product that can drastically affect the size of your Paypal account? You see, there are a zillion and one products available on the Internet - and so is the Internet population! Making money online is all about the numbers. Because an Internet marketer can have hundreds to thousands of visitors visiting his website every day, even the smallest changes can increase their profits dramatically. Just take a look at the math. A small tweak in a marketer's email headline will cause an additional 2% to open the E-mail (Let's assume the list size is about 50,000). If his 'open rate' used to be about 10%, an additional 2% would get at least an extra 1,000 pairs of new eyeballs reading your E-mail! But that is just the E-mail marketing aspect. What we want to do is to make our website convert like crazy! Imagine if among that additional 1,000 people, you are able to sell at least a thousand extra dollars' worth of E-products to them by making minor tweaks to your website? Imagine... if you are doing this OVER AND OVER AGAIN? Make no mistake about it. This book is going to give you straight to the point information that will skyrocket your profits. In this book, you will discover:

- How to make powerful changes in your branding that will make customers beat a path to your doorstep!
- By making some changes in your graphics, you will inspire your prospects to take action and turn that into more money in your pocket!
- How to tweak your sales copy and maximize your conversion without busting your bank account on copywriters.
- How to milk every last cent from your niche marketing sites!
- How to use video to increase sales!

Let's get started right NOW!

Online advertising, also called online marketing or Internet advertising, is a form of marketing and advertising which uses the Internet to deliver promotional marketing messages to consumers. It includes email marketing, search engine marketing (SEM), social media marketing, many types of display advertising (including web banner advertising), and mobile advertising. Like other advertising media, online advertising frequently involves both a publisher, who integrates advertisements into its online content, and an advertiser, who provides the advertisements to be displayed on the publisher's content. Other potential participants include advertising agencies who help generate and place the ad copy, an ad server who technologically delivers the ad and tracks statistics, and advertising affiliates who do independent promotional work for the advertiser. Internet marketing can also be broken down into more specialized areas such as Web marketing, email marketing and social media marketing:

- 1) Web marketing includes e-commerce Web sites, affiliate marketing Web sites, promotional or informative Web sites, online advertising on search engines, and organic search engine results via search engine optimization (SEO).
- 2) Email marketing involves both advertising and promotional marketing efforts via e-mail messages to current and prospective customers.
- 3) Social media marketing involves both advertising and marketing (including viral marketing) efforts via social networking sites like Facebook, Twitter, YouTube and Digg.

These two actions take some creativity and trial and error. The chapters were short but really had a lot of valuable information on the subject. The author was so kind as to give suggestions to different websites that one could use for the menagerie that it marketing, also I did not know that some of the biggest social networking sites had built in schedulers to schedule your posts. I have always used Hootsuite, which she also mentions. The chapter titled "Skills to Work On" was really helpful and brought together things and skills I never thought of or never thought of as important. If you are into social marketing, internet marketing or network marketing, this quick and concise book is a great guide to get you started!" ~Sara Linville "A short, fact-based and very informative book.
