Striking changes have occurred in the world since the publication of the last edition of *Viral Infections of Humans*. The global population is rapidly approaching 8 billion; climate change is leading to the introduction of new hosts, vectors and virus diseases heretofore never seen in many parts of the world; technological advances have revolutionized the ability to recognize and characterize viruses new and old; vaccines are altering the epidemiological landscape of the diseases they target, in some cases raising the hope of their eradication and remarkably powerful computational tools are enabling not only detection of outbreaks of disease much sooner than in the past but also, through complex mathematical modeling, more accurate prediction of their potential impact. The new Fifth Edition of *Viral Infections of Humans* captures the both the excitement and frustration of the dynamic struggle between humankind and the viruses that continue to cause immense suffering. It presents the latest concepts, methods and technologies in epidemiology, detection, investigation, modeling and intervention. Updated and entirely new chapters by dozens of experts across the field provide analytic summaries of current knowledge of viruses and prions causing acute syndromes, chronic illnesses and/or malignancies. In sum, this ambitiously expanded volume offers a uniquely comprehensive perspective on viruses in humans, from agents of classic diseases (e.g., hepatitis, measles, polio, rabies and yellow fever), to those with greatest pandemic impact (e.g., influenza and human immunodeficiency virus), to those discovered relatively recently (e.g., henipavirus, metapneumovirus and norovirus). The new Fifth Edition of *Viral Infections of Humans* is an invaluable reference for students, fellows and established professionals in the

fields of microbiology, public health and infectious disease epidemiology, medicine and health policy.

CSA Sociological Abstracts abstracts and indexes the international literature in sociology and related disciplines in the social and behavioral sciences. The database provides abstracts of journal articles and citations to book reviews drawn from over 1,800+ serials publications, and also provides abstracts of books, book chapters, dissertations, and conference papers.

Women's Health Principles and Clinical Practice is your practical guide and reference text to comprehensive women's health care. It provides a framework for approaching women at different stages of their lives including adolescence, menopause, and older womanhood. It addresses common conditions not traditionally addressed in specialty training and places a strong emphasis on preventive health. The text examines the care of women who have traditionally been invisible or ignored in clinical training, including lesbians and women with developmental disabilities. Newer areas such as the care of women at genetic risk for cancer are also examined. Also included are lists of organizations and web sites that provide up-to-date evidence-based information on the topics presented in the text.

NIH Guide for Grants and Contracts  
The EBCOG Postgraduate Textbook of Obstetrics & Gynaecology  
Gynaecology  
Cambridge University Press

An essential, up-to-date textbook for postgraduate trainees preparing for the EBCOG Fellowship exam.

Monthly, with annual cumulations. Comprehensive, current index to periodical medical literature intended for use of practitioners, investigators, and other

workers in community medicine who are concerned with the etiology, prevention, and control of disease. Citations are derived from MEDLARS tapes for Index medicus of corresponding date. Arrangement by 2 sections, i.e., Selected subject headings, and Diseases, organisms, vaccines. No author index.

"Summaries of papers" contained in the journal accompany each issue, 19--

Includes Abstracts section, previously issued separately.

An exhaustive reference on epidemiological aspects of viral infections in humans, with section on concepts and methods, acute viral infections, viral infections and malignant diseases, and chronic diseases. Chapters on specific viruses offer a common framework of material on methods of epidemiologic

Revised and updated by a new editorial team, the Sixth Edition of this text will remain the leading reference on the clinical care of the newborn. It provides complete, authoritative information on the biology of the newborn and the pathophysiology and management of diseases during the neonatal period. This edition has five new chapters on the role of telemedicine in neonatology, the impact of labor and delivery on the fetus, fetal determinants of adult disease, breast feeding, and control of breathing and apnea. Also included is a full-color insert illustrating key signs and symptoms, selected imaging techniques, and dermatologic conditions.

EUROCANCER s'efforce dans sa 17e édition et sans prétendre à une exhaustivité dorénavant impossible, d'identifier les éléments les plus saillants et les plus

Advances in Carcinoma in Situ Research and Treatment / 2012 Edition is a ScholarlyPaper™ that delivers timely, authoritative, and intensively focused information about Carcinoma in Situ in a compact format. The editors have built Advances in Carcinoma in Situ Research and Treatment / 2012 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Carcinoma in Situ in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Advances in Carcinoma in Situ Research and Treatment / 2012 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.
