This book highlights various dimensions of human habitats in 21st Century India. The human habitats in the country are marked by perceptible inequality in social and economic spheres. This is occurring in tandem with rapid socio-economic transformation across both rural and urban landscapes. There is a plurality of transformative characteristics in terms of social and economic classes, gender and space. Inequality in access to natural resources such as land and water is still a big factor in socio-economic differentiation in rural habitats. This constructs a pedestal of unequal opportunities and access to basic human necessities such as healthcare, education, potable water and sanitation. Human habitats experiencing socio-spatial segregation and exclusion based on caste, community and gender are detrimental in formation of a civil society and its sustainability in long terms. The ideal situation for this would be formation of an inclusive society that celebrates age old socio-cultural diversities, reduces inequalities and reveres composite culture.

This book engages readers in thirteen conversations presented by authors from around the world regarding the role that textbooks play in helping readers imagine membership in the nation. Authors' voices come from a variety of contexts – some historical, some contemporary, some providing analyses over time. But they all consider the changing portrayal of diversity, belonging and exclusion in multiethnic and diverse societies where silenced, invisible, marginalized members have struggled to make their voices heard and to have their identities incorporated into the national narrative. The authors discuss portrayals of past exclusions around religion, ethnicity, sexual orientation, as they look at the shifting boundaries of insider and outsider. This book is thus about "who we are" not only demographically, but also in terms of the past, especially how and whether we teach discredited pasts through textbooks. The concluding chapters provides ways forward in thinking about what can be done to promote curricula that are more inclusive, critical and positively bonding, in increasingly larger and more inclusive contexts.
