Some people think it's easier to climb the Everest than having others to help them in achieving what they really want. They think they can't get others helping them because each person is just interested in pursuing his or her happiness instead of taking care of other human beings. On the contrary, others rely too much on people help. Their approach, their way of getting results, and even their life, in the worst scenario, is 100% dependent from someone

ese. Have you ever found in one or both of the above mentioned situations? Well... I am sorry to tell you those are common believes of people that are frustrated about their life. They would like to have more but they do not know how to get it. They feel their life should be better but they fail to transform it in a better way. As always in life, the truth is in the middle. So the reality is that everyone is more interested in his agenda but if you are able to influence others playing with dark psychology and manipulation you can influence them to have your wished results as their main priority, for sure. It's not about neither brain washing nor black magic, it's just about using the right techniques, the right words, the right body language. An arsenal of persuasion weapons you can always exploit to get what you really want. Unfortunately, those topics are not taught at school. Indeed, this is one of the reason why only the 1% is successful in life. Don't get me wrong. Few years ago I was struggling in the same situation. I didn't want to have others to help me. I was fully committed to work hard following the wrong idea the world would just reward me for this. In the reality I was everybody's puppet. My colleague played with me, my wife grilled me like a pro. Even my children coax me as they wanted. One day I decided it was enough. So I started to invest in myself with the only goal to improve my life. So, I studied the main self-help and NLP books. And I understood the problem was me and my lack of awareness. Awareness about how to analyze people, how to pay attention to details such as body language and the main influencing techniques. Those were the solutions to my problems. You might be thinking "Is this correct? Are you a good person?" Of course I am. I do believe if you're not happy with your-self, you can't be a good person, a good husband and father. I am just in control of my life. And this is such a great feeling. So now my mission is to share my experience with others. In this book you will get three main benefits: The essential background

in this section, more detailed techniques will be explained in the following section. Neuro refers to the body's nervous system, in particular, the most important part of the nervous system, the brain. While human beings receive information from the outside world by using the five senses, the brain is responsible for sorting through and organizing all of the information that is received and plays a vital role in how you decide to act based on that information. Everyone's brain has a slightly different method of filtering through information: some are faster, more efficient, and more observant, while other people have to take their time in sorting information, and are not able to maximize the value they receive from it, while still others are somewhere in between the two extremes. Of course, ideally, your brain would have a filtering process that is as quick and effective as possible. By utilizing NLP techniques, you can train your brain to handle the intake of information at a faster and more productive pace, and can better determine how to use that information to gain an edge over other people in the same environment. In NLP, your process for mentally filtering and sorting external information is crucial. After all, neuro is only the first step in the NLP process. Your first impression of the information gained from the filtering process is known as "First Access," and is comprised mainly of feelings, sounds, and images, all embedded within your subconsciousness. By being more attentive to the world around us, we can increase the strength of our First Access, and therefore have a better quality of information to feed our subconsciousness, which plays into how we make conscious decisions.

Having a stronger First Access also impacts the ability to communicate with others, both on a conscious and subconscious level; if you have better access to information than another person, then you can better use that information to steer them in the direction that you want them to go.
