This Brief examines the “militarization” of law enforcement in the United States through the lens of the stakeholders primarily responsible for implementing, funding, and enacting the practice. Largely a result of policies such as the war on drugs, war on terror, and the 1033 program, there has been a gradual but dramatic rise in the use of military-grade weapons, equipment, and tactics used by police agencies across the United States. This Brief examines the level of support for various aspects of police militarization by lawmakers, police executives, and local police officers, and how their opinions may differ based upon their current position or demographic features using a series of analyses and propensity score matching techniques. This Brief also provides an overview of some of the key policy changes responsible for police militarization, and provides insights into the views held by policymakers and law enforcement on various aspects of the practice. The results indicate that while many responsible for this shift are in favor of paramilitary procurement programs, there are differing opinions on key issues such as oversight and use of military-grade weapons, equipment and paramilitary tactics. This work will be of interest to researchers in criminology and criminal justice, particularly those with an interest in policing studies, as well as related fields such as public policy, public administration, emergency management, and sociology.

The Cycle of Juvenile Justice takes a historical look at juvenile justice policies in the United States. Tracing a pattern of policies over the past 200 years, the book reveals cycles of reforms advocating either lenient treatment or harsh punishments for juvenile delinquents. Bernard and Kurlychek see this cycle as driven by several unchanging ideas that force us to repeat, rather than learn from, our history. This timely new edition provides a substantial update from the original, incorporating the vast policy changes from the 1990s to the present, and placing these changes in their broader historical context and their place within the cycle of juvenile justice. The authors provide a provocative and honest assessment of juvenile justice in the 21st century, arguing that no policy can solve the problem of youth crime since it arises not from the juvenile justice system, but from deeper social conditions and inequalities. With this highly-anticipated new edition, The Cycle of Juvenile Justice will continue to provide a controversial, challenging, and enlightening perspective for a broad array of juvenile justice officials, scholars, and students alike.

Handbook of Drug-Nutrient Interactions, Second Edition is an essential new work that provides a scientific look behind many drug-nutrient interactions, examines their relevance, offers recommendations, and suggests research questions to be explored. In the five years since publication of the first edition of the Handbook of Drug-Nutrient Interactions new perspectives have emerged and new data have been generated on the subject matter. Providing both the scientific basis and clinical relevance with appropriate recommendations for many interactions, the topic of drug-nutrient interactions is significant for clinicians and researchers alike. For clinicians in particular, the book offers a guide for understanding, identifying or predicting, and ultimately preventing or managing drug-nutrient interactions to optimize patient care. Divided into six sections all chapters have been revised or are new to this edition. Chapters balance the most technical information with practical discussions and include outlines that reflect the content; discussion questions that can guide the reader to the critical areas covered in each chapter, complete definitions of terms with the abbreviation fully defined and consistent use of terms between chapters. The editors have performed an outstanding service to clinical pharmacology and pharmaco-nutrition by bringing together a multi-disciplinary group of authors. Handbook of Drug-Nutrient Interactions, Second Edition is a comprehensive up-to-date text for the total management of patients on drug and/or nutrition therapy but also an insight into the recent developments in drug-nutrition interactions which will act as a reliable reference for clinicians and students for many years to come.

This is a collection of articles dealing with the point of view of symbolic interactionism and with the topic of methodology in the discipline of sociology. It is written by the leading figure in the school of symbolic interactionism, and presents what might be regarded as the most authoritative statement of its point of view, outlining its fundamental premises and sketching their implications for sociological study. Blumer states that symbolic interactionism rests on three premises: that human beings act toward things on the basis of the meanings of things have for them; that the meaning of such things derives from the social interaction one has with one's fellows; and that these meanings are handled in, and modified through, an interpretive process.

An insider view of an urban subculture! While much of the literature on police analyzes critically what they do, few works address issues of how police officers feel about their chosen profession, their worldview, or their visions. This refreshingly original and unique ethnographic contribution by anthropologist Joan Barker exposes the human element rarely seen by non-police officers working for the often-controversial L.A.P.D. During her twenty years of fieldwork, Barker gathered valuable information through formal, in-depth interviews and firsthand experiences, distilling her findings into an illuminating, coherent account. She discovers that five phases of occupational socialization normatively mold officers experiences and perceptions. Fleshing out her discussion is the compelling narrative of Fred, a traditional officer whose authentic voice reveals feelings and attitudes that manifest the essence of the human who does the job of policing. An insider view of an urban subculture usually known only from its public presentation.

Presents an interdisciplinary approach to police management, achieving a balance between theory and practice. This text offers students and those interested in managing police organizations an analytic approach to police managerial issues and practices. It also offers a historical framework for understanding contemporary police management. The patrolman has the most difficult, complex, and least understood task in the police department. Much less is known of him than of his better publicized colleague, the

detective. In this important and timely book, James Q. Wilson describes the patrolman and the problems he faces that arise out of constraints imposed by law, politics, public opinion, and the expectations of superiors. The study considers how the uniformed officer in eight communities deals with such common offenses as assault, theft, drunkenness, vice, traffic, and disorderly conduct. Six of the communities are in New York State: Albany, Amsterdam, Brighton, Nassau County, Newburgh, and Syracuse. The others are Highland Park, Illinois, and Oakland, California. Enforcing laws dealing with common offenses is especially difficult because it raises the question of administrative discretion. Murder, in the eyes of the police, is unambiguously wrong, and murderers are accordingly arrested; but in cases such as street-corner scuffles or speeding motorists, the patrolman must decide whether to intervene (should the scuffle be stopped? should the motorist be pulled over?) and, if he does, just how to intervene (by arrest? a warning? an interrogation?). In most large organizations, the lowest-ranking members perform the more routinized tasks and the means of accomplishing these tasks are decided by superiors, but in a police department the lowest-ranking officer--the patrolman--is almost solely responsible for enforcing those laws which are the least precise, the most ambiguous. Three ways or "styles" of policing--the watchman, the legalistic, and the service styles--are analyzed and their relation to local politics is explored. In the final chapter, Mr. Wilson discusses if and how the patrolman's behavior can be changed and examines some current proposals for reorganizing police departments. He observes that the ability of the patrolman to do his job well may determine our success in managing social conflict and our prospects for maintaining a proper balance between liberty and order.

Why Love Matters explains why loving relationships are essential to brain development in the early years, and how these early interactions can have lasting consequences for future emotional and physical health. This second edition follows on from the success of the first, updating the scientific research, covering recent findings in genetics and the mind/body connection, and including a new chapter highlighting our growing understanding of the part also played by pregnancy in shaping a baby's future emotional and physical well-being. Sue Gerhardt focuses in particular on the wide-ranging effects of early stress on a baby or toddler's developing nervous system. When things go wrong with relationships in early life, the dependent child has to adapt; what we now know is that his or her brain adapts too. The brain's emotion and immune systems are particularly affected by early stress and can become less effective. This makes the child more vulnerable to a range of later difficulties such as depression, anti-social behaviour, addictions or anorexia, as well as physical illness. Why Love Matters is an accessible, lively, account of the latest findings in neuroscience, developmental

psychology and neurobiology – research which matters to us all. It is an invaluable and hugely popular guide for parents and professionals alike.

*Policing and Public Management* takes a new perspective on the challenges and problems facing the governance of police forces across the UK and the developed world. Complementing existing texts in criminology and police studies, Morrell and Bradford draw on ideas from the neighbouring fields of public management and virtue ethics to open the field up to a broader audience. This forms the basis for an imaginative reframing of policing as something that either enhances or diminishes "the public good" in society. The text focuses on two cross-cutting aspects of the relationship between the police and the public: public confidence and public order. Extending award-winning work in public management, and drawing on extensive and varied data sources, *Policing and Public Management* offers new ways of seeing the police and of understanding police governance. This text will be valuable supplementary reading for students of public management, policing and criminology, as well as others who want to be better informed about contemporary policing.

*Corrections in the Community, Sixth Edition*, examines the current state of community corrections and proposes an evidence-based approach to making programs more effective. As the U.S. prison system approaches meltdown, options like probation, parole, alternative sentencing, and both residential and non-residential programs in the community continue to grow in importance. This text provides a solid foundation and includes the most salient information available on the broad and dynamic subject of community corrections. Authors Latessa and Smith organize and evaluate the latest data on the assessment of offender risk/need/responsivity and successful methods that continue to improve community supervision and its effects on different types of clients, from the mentally ill to juveniles. This book provides students with a thorough understanding of the theoretical and practical aspects of community corrections and prepares them to evaluate and strengthen these crucial programs. This sixth edition

Introduction to Corrections provides a comprehensive foundation of corrections that is practitioner-driven and grounded in modern research and theoretical origins. This text uniquely illustrates how the day-to-day practitioner conducts business in the field of corrections in both institutional and community settings. Experienced correctional practitioner, scholar, and author Robert D. Hanser shows readers how the corrections system actually works, from classification, to security, to treatment, to demonstrating how and why correctional practices are implemented. Furthering the reality of the modern correctional experience, the Third Edition includes a new chapter on immigration detention centers.

In 1981 Victor Hassine was sentenced to prison for life without parole for a capital offense. This book is an insightful look at conditions of confinement and prison life in America today. Hassine powerfully conveys the changes in prison life which have come about as a result of the use of drugs, prison overcrowding, and demographic changes in inmate populations. Topics covered include rape, prison gangs, prison violence, AIDS, homosexuality, and prison politics. The second edition features five new chapters that explore crucial topics expanding on the first edition, graphically documenting the extreme violence that is a part of everyday life in a men's maximum-high security prison. A new appendix offers details about the capital crime for which Hassine received a life-without-parole sentence. It also provides fascinating coverage of how the

first edition was received by inmates and correctional officers --Cover.

An Interdisciplinary Approach Criminal Law provides students with an integrated framework for understanding the U.S. criminal justice system with a diverse and inclusive interdisciplinary approach and thematic focus. Authors Katheryn Russell-Brown and Angela J. Davis go beyond the law and decisions in court cases to consider and integrate issues of race, gender, and socio-economic status with their discussion of criminal law. Material from the social sciences is incorporated to highlight the intersection between criminal law and key social issues. Case excerpts and detailed case summaries, used to highlight important principles of criminal law, are featured throughout the text. The coverage is conceptual and practical, showing students how the criminal law applies in the “real world”—not just within the pages of a textbook. What does police violence against minorities, or violent clashes between minorities and the police tell us about citizenship and its internal hierarchies? Indicative of deep-seated tensions and negative perceptions; incidents such as these suggest how minorities are vulnerable, suffer from or are subject to police abuse and neglect in Israel. Marked by skin colour, negatively stigmatized or rendered security threats, their encounters with police provide a daily reminder of their defunct citizenship. Taking as case studies the experiences and perceptions of four minority groups within Israel including Palestinian/Arab citizens, ultra-Orthodox Jews and Ethiopian and Russian immigrants, Ben-Porat and Yuval are able to explore different paths of citizenship and the stratification of the citizenship regime through relations with and perceptions of the police in Israel. Touching on issues such as racial profiling, police brutality and neighbourhood neglect, their study questions the notions of citizenship and belonging, shedding light on minority relationships with the state and its institutions.

This text explores the challenges that convicted offenders face over the course of the rehabilitation, reentry, and reintegration process. Using an integrated, theoretical approach, each chapter is devoted to a corrections topic and incorporates original evidence-based concepts, research, and policy from experts in the field, and examines how correctional practices are being managed. Students are exposed to examples of both the successful attempts and the failures to reintegrate prisoners into the community, and they will be encouraged to consider how they can help influence future policy decisions as practitioners in the field.

This edited collection is concerned with the ideas, challenges, demands and framework of conditions behind police education from an international perspective. Whilst not directly concerned with a classical comparison of education concepts from different countries, the broad range of international contributors consider issues such as professionalization programmes, how higher education programmes influence police organizations, as well how higher education influences police practice in a global context. Examining a wide array of countries from Germany to China and Brazil to show the flawed nature of an education system based purely upon an approach concerned with police officer numbers, the editors of this book argue for the need for greater scientific education among police around the world to meet contemporary developments. A timely and well-informed study, this book meets a crucial gap in the literature and will serve as an important contribution to existing work on policing, crime prevention, and theoretical criminology.
