Managerial Accounting for Managers, 4th edition by Noreen/Brewer/Garrison is based on the market-leading managerial accounting solution, Managerial Accounting, by Garrison, Noreen and Brewer. The Noreen solution presents integrated and proven solutions designed to help attain course goals of student readiness, comprehension of content, and application of key concepts in the managerial accounting course, while addressing the needs of instructors who do not wish to teach the financial accounting-oriented content that is included in the Garrison solution (no debits/credits). Of the three programs in the Garrison franchise (the Brewer solution, the Garrison solution, and the Noreen solution), the Noreen solution is the most pure management accounting content. The other two programs contain greater coverage of financial accounting topics. Managerial Accounting for Managers 4e is geared towards

professors who love Garrison's market-leading managerial accounting content but prefer to approach their course by eliminating the debits and credits coverage. The Noreen solution includes the managerial accounting topics such as Relevant Costs for Decision Making, Capital Budgeting Decisions, and Segment Reporting and Decentralization, however, the job-order costing chapter has been extensively rewritten to remove all journal entries. Furthermore, the chapters dealing with process costing, the statement of cash flows, and financial statement analysis have been dropped to enable professors to focus their attention on the bedrocks of managerial accounting—planning, control, and decision making. McGraw-Hill's Connect Accounting offers a complete digital solution combines all the great features of Connect Accounting including McGraw-Hill's SmartBook, powered by LearnSmart, which is designed to help students learn faster and more efficiently, and retain more knowledge for greater success. In addition, Interactive Presentations deliver learning objectives in an interactive environment, giving students access to course-critical content anytime, anywhere. Guided Examples provide students with narrated and animated, step-by-step walkthroughs of algorithmic versions of assigned exercises. Auto-Graded Excel Simulations, assignable within Connect Accounting, allow students to practice their Excel skills—such as basic formulas and formatting—within the context of accounting. These questions feature animated, narrated Help and Show Me tutorials (when enabled), as well as automatic feedback and grading for both students and professors. The Eleventh Edition of Advanced Financial Accounting is an up-to-date, comprehensive, and highly illustrated presentation of the accounting and reporting principles and procedures used in a variety of business entities. This text is written as an integrated work in managerial accounting, and is intended for use as a basic text for students after completing a first semester or quarter course in financial accounting at either the undergraduate or graduate level. This text is organized around the following major areas of managerial accounting: An Overview of Managerial Accounting. In this section, the text discusses the uses of managerial accounting and contrasts the type and use of information provided by managerial accounting and financial accounting (Chapter 1). Chapter 2 focuses on basic cost information and behavior. In this chapter we distinguish between the different types of costs incurred by organizations. In addition, this chapter discusses the behavior of these costs with changes in activity as well as the effect of cost behavior on managerial decisions. Cost Accumulation. Chapters 3 through 5 illustrate the process through which the organization accumulates costs with its products and services. In Chapter 3,

we focus on production and service processes that require different levels of effort across individual jobs (job-order costing). Chapter 4 illustrates the cost accumulation process for manufacturing environments characterized by the production of a large number of similar products (process costing). Chapter 5 focuses on the process through which overhead costs are accumulated with the organization's inventory and services. The dedication of an entire chapter to overhead costs is considered necessary given the importance of controlling overhead costs to organizations in manufacturing inventory and providing services. The Use of Managerial Accounting Information. Chapters 6 through 11 describe various uses of managerial accounting information. Topics discussed in these chapters include variable costing and cost-volume-profit analysis (Chapter 6), standard costing and determination of variances (Chapter 7), budgeting (Chapter 8), responsibility accounting (Chapter 9), short-term managerial decisions (Chapter 10), and capital budgeting (Chapter 11). In these chapters, the basic principles of cost behavior and cost accumulation discussed in the preceding two sections are applied to important decisions facing managers in today's business world.

Management and cost accounting has been the basic toolbox in business administration for decades. Today it is an integral part of all curricula in business education and no student can afford not to be familiar with its basic concepts and instruments. At the same time, business in general, and management accounting in particular, is becoming more and more international. English clearly has evolved as the "lingua franca" of international business. Academics, students as well as practitioners exchange their views and ideas, discuss concepts and communicate with each other in English. This is certainly also true for cost accounting and management accounting. Management Accounting is becoming increasingly international. "Management and Cost Accounting" is a new English language textbook covering concepts and instruments of cost and management accounting at an introductory level (Bachelor, but also suited for MBA courses due to strong focus on practical applications and cases). This textbook covers all topics that are relevant in management accounting in business organizations and that are typically covered in German and Central European Bachelor classes on cost accounting and management accounting. After an introduction to the topic, including major differences between the German approach and the purely Anglo-

Saxon approach of management accounting, the book describes different cost terms and concepts applied in German cost accounting, The book is much more specific here compared to US-American standard textbooks. Based on different cost concepts, the topic of cost behavior is discussed, including the determination of cost functions. The heart of the book guides the reader through the general structure of a fully developed cost accounting system following the German and Central European standard: It starts with cost type accounting, moves on to cost center accounting and finally deals with cost unit accounting, assigning cost to goods and services offered in the market. The remaining parts of the book deal with decision making and how management and cost accounting data can support managers in this task. A comparison of absorption costing and variable costing introduces the reader to management decisions such as product portfolio and outsourcing decisions. Additionally, cost-volume-profit analysis (break-even-analysis) is covered. The book closes with a comprehensive treatment of cost planning and variance analysis.
