Jairus Victor Grove contends that we live in a world made by war. In *Savage Ecology* he offers an ecological theory of geopolitics that argues that contemporary global crises are better understood when considered within the larger history of international politics. Infusing international relations with the theoretical interventions of fields ranging from new materialism to political theory, Grove shows how political violence is the principal force behind climate change, mass extinction, slavery, genocide, extractive capitalism, and other catastrophes. Grove analyzes a variety of subjects—from improvised explosive devices and drones to artificial intelligence and brain science—to outline how geopolitics is the violent pursuit of a way of living

that comes at the expense of others. Pointing out that much of the damage being done to the earth and its inhabitants stems from colonialism, Grove suggests that the Anthropocene may be better described by the term Eurocene. The key to changing the planet's trajectory, Grove proposes, begins by acknowledging both the earth-shaping force of geopolitical violence and the demands apocalypses make for fashioning new ways of living.

Abandoned and alone, a beautiful blonde is at the mercy of the harsh Wyoming Territory—until Chief Cloud Walker sweeps her into the safety of his arms.

### Savage Moon

From the New York Times bestselling author of Midnight Falcon comes a new Indian romance set in the lush expanse of the Great Plains -an extraordinary tale of divided loyalties and passionate hearts...

Henry David Thoreau built a log cabin in the Concord Forest in Massachusetts in 1845. Thoreau lived there for two years to try out an alternative to the hectic and economically successful everyday life. The reason: He wanted to consciously feel life in harmony with nature again. The minimalist lifestyle should create space and time for the essentials. Thoreau kept a diary about his feelings and experiences during his time in the forest. This book arose from his notes. It deals with his everyday problems, with economic and philosophical considerations, with the feeling of loneliness, with the animals of the forest, with the seasons and with the reading of classical works.

Stranded in the West by her father's untimely death, Dayanara vows to complete his archaeological mission and uncover the monster bones of Indian legend--however, there is a disturbingly handsome Cree chief impeding her progress.

*Visions of Savage Paradise* is the first major book-length study of seventeenth-century Dutch artist Albert Eckhout to be published in nearly seventy years. Eckhout, who was court painter to the colonial governor of Dutch Brazil, created life-size paintings of Amerindians, Africans, and Brazilians of mixed race in support of the governor's project to document the people and natural history of the colony. In this study, Rebecca Parker Brien provides a detailed analysis of Eckhout's works, framing them with discussions of both their colonial context and contemporary artistic practices in the Dutch republic.

“[This] fine history of Prohibition . . . could have a major impact on how we read American political history.”—James A. Morone, New York Times Book Review

Prohibition has long been portrayed as a “noble experiment” that failed, a newsreel story of glamorous gangsters, flappers, and speakeasies. Now at last Lisa McGirr dismantles this cherished myth to reveal a much more significant history. Prohibition was the seedbed for a pivotal expansion of the federal government, the genesis of our

contemporary penal state. Her deeply researched, eye-opening account uncovers patterns of enforcement still familiar today: the war on alcohol was waged disproportionately in African American, immigrant, and poor white communities. Alongside Jim Crow and other discriminatory laws, Prohibition brought coercion into everyday life and even into private homes. Its targets coalesced into an electoral base of urban, working-class voters that propelled FDR to the White House. This outstanding history also reveals a new genome for the activist American state, one that shows the DNA of the right as well as the left. It was Herbert Hoover who built the extensive penal apparatus used by the federal government to combat the crime spawned by Prohibition. The subsequent federal wars on crime, on drugs, and on terror all display the inheritances of the war on alcohol. McGirr shows the powerful American state to be a bipartisan creation, a legacy not only of the New Deal and the Great Society but also of Prohibition and its progeny. The War on Alcohol is history at its best—original, authoritative, and illuminating of our past and its continuing presence today. Abandoned by the man who was supposed to protect her, Dede Martin and her son are captured by a magnificent Indian, Thunder Heart, who makes her pulse race at a touch. Original.

. Renewal of Life by Transmission. The most notable distinction between living and inanimate things is that the former maintain themselves by renewal. A stone when struck resists. If its resistance is greater than the force of the blow struck, it remains

outwardly unchanged. Otherwise, it is shattered into smaller bits. Never does the stone attempt to react in such a way that it may maintain itself against the blow, much less so as to render the blow a contributing factor to its own continued action. While the living thing may easily be crushed by superior force, it none the less tries to turn the energies which act upon it into means of its own further existence. If it cannot do so, it does not just split into smaller pieces (at least in the higher forms of life), but loses its identity as a living thing. As long as it endures, it struggles to use surrounding energies in its own behalf. It uses light, air, moisture, and the material of soil. To say that it uses them is to say that it turns them into means of its own conservation. As long as it is growing, the energy it expends in thus turning the environment to account is more than compensated for by the return it gets: it grows. Understanding the word "control" in this sense, it may be said that a living being is one that subjugates and controls for its own continued activity the energies that would otherwise use it up. Life is a self-renewing process through action upon the environment.
