Very few careers can offer you the freedom, flexibility and income that day trading does. As a day trader, you can live and work anywhere in the world. You can decide when to work and when not to work. You only answer to yourself. That is the life of the successful day trader. Many people aspire to it, but very few succeed. Day trading is not gambling or an online poker game. To be successful at day trading you need the right tools and you need to be motivated, to work hard, and to persevere. At the beginning of my trading career, a pharmaceutical company announced some positive results for one of its drugs and its stock jumped from \$1 to over \$55 in just two days. Two days! I was a beginner at the time. I was the amateur. I purchased 1,000 shares at \$4 and sold them at over \$10. On my very first beginner trade, I made \$6,000 in a matter of minutes. It was pure luck. I honestly had no idea what I was doing. Within a few weeks I had lost that entire \$6,000 by making mistakes in other trades. I was lucky. My first stupid trade was my lucky one. Other people are not so lucky. For many, their first mistake is their last trade because in just a few minutes, in one simple trade, they lose all of the money they had worked so hard for. With their account at zero, they walk away from day trading. As a new day trader you should never lose sight of the fact that you are competing with professional traders on Wall Street and other experienced traders around the world who are very serious, highly equipped with advanced education and tools, and most importantly, committed to making money. Day trading is not gambling. It is not a hobby. You must approach day trading very, very seriously. As such, I wake up early, go for a run, take a shower, get dressed, eat breakfast, and fire up my trading station before the markets open in New York. I am awake. I am alert. I am motivated when I sit down and start working on the list of stocks I will watch that day. This morning routine has tremendously helped my mental preparation for coming into the market. Whatever your routine is, starting the morning in a similar fashion will pay invaluable dividends. Rolling out of bed and throwing water on your face 15 minutes before the opening bell just does not give you sufficient time to be prepared for the market's opening. Sitting at your computer in your pajamas or underwear does not put you in the right mindset to attack the market. I know. I've experienced all of these scenarios. In *How to Day Trade for a Living*, I will show you how you too can take control over your life and have success in day trading on the stock market. I love teaching. It's my passion. In this book, I use simple and easy to understand words to explain the strategies and concepts you need to know to launch yourself into day trading on the stock market. At last a book that champions the small investor, the growing bank of potential shareholders who have cash to spare but fear entering the jungle that is the City of London. "Shares Made Simple", written by highly respected financial journalist Rodney Hobson, tears away the mystique and jargon that surrounds the stock market. It takes you step by

Have you ever heard the word "investing" before, but you have never understood what it really means? It's actually quite simple—it means making your money work while you do what you want. Basically, it's a different way of thinking about how to make money. While growing up, most of us have been taught that we can only earn an income by finding a good job—and that's exactly what most of us do. However, there is a big problem with this—if you want more money, you have to work longer hours. However, there is a limit to the number of hours a day we can work on—not to mention the fact that having a lot of money is not fun if we do not have the time to enjoy it. This is why rich people do not have a job—they have businesses that work for them. Think about it—you have a job that allows you to earn over 2000 dollars a month, but that takes you over 13 hours a day, 6 days out of 7, so about 11 remain—and usually, the hours of sleep should be at least 7–8 (for a healthy lifestyle). Considering also the displacements and the time lost to go to work, you have 3 to 4 hours left, where you most likely will use 2 for dinner in the evening. In the end, there are 2 actual hours of time per day, which do not allow you to enjoy life to the fullest. You will find yourself having a 2000-dollars-a-month salary (which, nowadays, is nothing) that will continue to accumulate, as you will not absolutely enjoy them in any way. This is what is often called the "rat race." Is there a solution? Yes, it exists, and it is to take part of your money and invest it properly in the financial markets. By doing so, you are letting it work for you. The possibilities are scary and extremely profitable. Do you want one example? Take a look at Apple's stocks. Apple's stocks have risen at a frightening rate in the last 10 years, from \$10 to about \$100. This means that with an investment of only \$ 1,000, you would now have over 10 thousand dollars. This is the power of online investing—it allows you to grow your money in a totally automatic way. Unfortunately, there is no duplication of self to increase the time at work, but instead, you can create an "extension" of yourself—that is, your money—and put it to work. In this way, while you are working for your employer, or while you are at the bar with friends, you can still earn at the same time—thanks to the investment you made. In a very simple way, therefore, you can make your money useful, thus maximizing your earning potential, even if you do not receive an increase in your pay, or even if you do not decide to make an extraordinary one, or you are looking for a more remunerative job. There are many ways to do this. This includes investing your money in stocks, bonds, mutual funds, forex, CFDs or real estate (and many other things), or even starting your own online business (like affiliate marketing). Sometimes, people refer to these options as "investment vehicles," which is just another way of saying "a way of investing."

Ratios provide an extremely effective method of understanding company accounts. At their most basic this usually involves taking one figure from the published accounts and dividing it by another - however, this seemingly simple process can reveal an enormous amount about both the nature and performance of a company. 'Ratios Made Simple' looks at ratios from the perspective of an investor, providing a toolkit for investors to use to accurately analyse a company from its accounts. This book is divided into nine chapters, with each chapter looking at a different aspect of potential concern to an investor: 1. Profitability Ratios 2. Investment Ratios 3. Dividend Cover 4. Margins 5. Gearing 6. Solvency Ratios 7. Efficiency Ratios 8. Policy Ratios 9. Volatility For each ratio, financial expert Robert Leach provides a detailed definition, explains how it works, describes its use. Investors are also given a simple explanation of how to calculate each ratio, what the ratio means and how the investor should apply the answers in making investment decisions. This book provides the investor with an essential guide to the use of these powerful analytical tools - tools that should form a vital part of an investor's decision-making process. Anyone who is thinking of investing, however much or however little, will benefit from the information, advice and guidance contained in these pages. Similarly those who already have a portfolio will find it helpful to stand back and reassess whether they are making the most of their money and whether their portfolio is meeting their needs. Many investors simply pick shares that take their fancy, or perhaps ones that have been recommended in the financial press, without any thought for whether their selections create a suitable or balanced portfolio. They then cling on to their purchases irrespective of whether their investment needs have changed or whether the companies they chose still meet the investment objectives. *How to Build a Share Portfolio* explains in simple terms the criteria for picking shares in the first place and for deciding which companies to retain and which to dump. Written in a clear, easy to follow style that will suit beginners and more experienced investors alike, it is packed with real case studies taken from actual stock market events and developments to illustrate the key points.
