The golden rule of shallow flings is not to get attached, right? Well, Havana Ramos broke it. Big time. There's just something about Tate Devereaux that pulls at her. Assertive, compelling, and self-assured, the Alpha cat shifter pushes every one of her best buttons. Like really, really hard. Having overheard an enlightening conversation, she knows he won't give her more than a fling-something, to be fair, he'd told her well in advance. If she doesn't want her heart to get bruised, it's time to end what little they have. It's not like he'll care or anything. Except ... it turns out that he does. Newly-appointed Alpha Tate Devereaux is never bothered when women walk away. He can't exactly blame them, given his distrustful cat's habit of withdrawing from relationships. But when lone shifter Havana ends their fling, everything within Tate rebels against it-including his cat. Even as she and Tate work together to crush the threat looming over her, Havana holds him at arms' length. But if she thinks she can end their fling with no real explanation and that he'll just tip his hat and walk away, she's forgotten one very important thing-there's nothing easy about shaking off an Alpha.

When female wolf shifter Taryn Warner first encounters Trey Coleman, an alpha male wolf shifter with a dangerous reputation, she's determined to

resist his charms. But Taryn finds herself drawn in by Trey's forceful demeanor and arctic-blue eyes, and she eventually agrees to enter an uneasy alliance with him. If the two succeed in convincing their respective packs that they've chosen each other as mates, Trey will win valuable political allies, while Taryn will escape an odious arranged mating. Will they be able to maintain the clear heads needed to pull off the deception?

A new paranormal romance from Wall Street Journal and USA Today bestseller Jaymin Eve. My father made a terrible mistake. One I'm left paying for. As a wolf shifter growing up in a strong pack, I should be living my best life. But after my father tried to kill our leader, I'm labelled an outcast, traitor, less than dirt. When I can't take pack life any longer, I run, but apparently they don't like losing their punching bag. Torin, the leader's son, drags me back before my first shift... a shift that will reveal my true mate. I never could have predicted who mine would be, but the moment my wolf looks upon him, I'm filled with hope for a brighter future. Afterall, no one ever rejects their true mate, right? Wrong. Very wrong. When the wolves attack, my soul screams for vengeance, and somehow I touch the shadow world. Somehow I bring him to our lands. The Shadow Beast. Our shifter god. The devil himself. Turns out being rejected by my mate was only the beginning.

When had life stopped being so simple? Probably around the time that Casey Frost first agreed to pay off her drug addict brother's debt to save him from a brutal beating. It soon became a "thing." When the dealer--who's also an Alpha shifter--demands she do something that goes against her very being, Casey decides enough is enough. It's while she's confronting the Alpha that he appears--Eli Axton, a ruthless wolf shifter with a dark reputation. When their eyes lock and the mating urge violently kicks in, she knows her world is about to change. The last unmated male in his pack, Eli feels weary and alone. Seeing his friends so happy makes the Head Enforcer acutely feel the absence of his true mate. He wouldn't have expected to find her in the parking lot of a shifter fight club, or for her to be such an unusual breed of shifter. Certain that the female

enforcer belongs to him, he doesn't hesitate to claim her. Not everyone is happy to see Casey mated, though. Soon danger is coming at them from different angles, threatening the life they're trying to build. Their enemy needs to be eradicated fast. But how did you destroy an enemy when you weren't sure who they were?

They may not be made for each other, but animal instincts are impossible to ignore. Madisyn Drake is a rare breed of cat shifter...a loner, unpredictably wild, and emotionally distant. A recent betrayal has left her ready to sharpen her claws on the next man she sees...until a prowling wolf with steel-gray eyes and a brooding dark edge challenges her distrust. No matter how fully he satisfies her touch-hunger, Madisyn's not ready to open up again, even if it is oh so gratifying. Bracken Slater has earned his reputation as an indomitable predator. Once broken by grief and guilt, Brack is feeling alive again, thanks to the heady scent of this independent feline.

Convincing her that they're meant for each other is going to take more than branding Madisyn's beautiful neck. She's not interested in joining an unfamiliar pack, much less answering to an alpha. But when threats from both their pasts take shape, their unexpected destiny may be the only thing that can save them.

What determines whether complex life will arise on a planet, or even any life at all? Questions such as these are investigated in this groundbreaking book. In doing so, the authors synthesize information from astronomy, biology, and paleontology, and apply it to what we know about the rise of life on Earth and to what could possibly happen elsewhere in the universe. Everyone who has been thrilled by the recent discoveries of extrasolar planets and the indications of life on Mars and the Jovian moon Europa will be fascinated by *Rare Earth*, and its implications for those who look to the heavens for companionship.

This report considers the biological and behavioral mechanisms that may underlie the pathogenicity of tobacco smoke. Many Surgeon General's reports have considered research findings on mechanisms in assessing the biological plausibility of associations observed in epidemiologic studies. Mechanisms of disease are important because they may provide plausibility, which is one of the guideline criteria for assessing evidence on causation. This report specifically reviews the evidence on the potential mechanisms by which smoking causes diseases and considers whether a mechanism is likely to be operative in the production of human disease by tobacco smoke. This evidence is relevant to understanding how smoking causes disease, to

identifying those who may be particularly susceptible, and to assessing the potential risks of tobacco products.

In the tradition of Octavia Butler, here is radical self-help, society-help, and planet-help to shape the futures we want. Change is constant. The world, our bodies, and our minds are in a constant state of flux. They are a stream of ever-mutating, emergent patterns. Rather than steel ourselves against such change, Emergent Strategy teaches us to map and assess the swirling structures and to read them as they happen, all the better to shape that which ultimately shapes us, personally and politically. A resolutely materialist spirituality based equally on science and science fiction: a wild feminist and afro-futurist ride! adrienne maree brown, co-editor of Octavia's Brood: Science Fiction from Social Justice Movements, is a social justice facilitator, healer, and doula living in Detroit.

Gwen Miller may be a human, but she has no problem taking a stand against her own kind. She's going to testify against the teenage boy she saw viciously assault a lone shifter female--and no amount of pressure from the boy's wealthy family will make her back down. But when the harassment turns violent, help comes in the form of a lean, toned wolf with winter-gray eyes. As a guest at Gwen's inn, shifter enforcer Zander Devlin can't help but notice that the fierce and leggy brunette is in serious trouble. Since she's putting herself at risk for one of his kind, keeping her safe is the least he can do. That's not the only reason Zander wants her close. He desires her, even as the wolf inside him backs away from her. But his feral instincts are hard to keep down, and as they take shape, they're harder for Gwen to resist. Then

again, embracing them could be the only thing that could save her life.

Cat shifter Bree Dwyer doesn't fear much. Ironically, what she fears most is the person who was put on the Earth just for her. Your true mate wasn't supposed to be cruel and twisted; wasn't supposed to be someone who'd never love or want to claim you. The rumors that her true mate is dead bring her only relief. Bree's intent on moving forward with her life and building a future with someone else. Sadly, the male she wants most is one she can never have--a hot-as-sin wolverine shifter who happens to be her boss ... and the cousin of her predestined mate. Aleksandr "Alex" Devereaux detests being bullshitted, but he's been lying to himself for years--pretending he thinks of Bree as extended family; that he doesn't want her so bad he aches with it; that he can't feel himself weakening against her pull. The night they spend together changes everything. He's done fighting himself on what he wants. Someone isn't happy about that. Possibly the same 'someone' who's playing mind games with Bree, trying to scare her. They're succeeding, because too many leads point to the possibility that the culprit could be the one person that she's determined to believe is dead.

She finds that not only has the army never included a woman, but it has never included a Sventé vampire; a breed that is regarded by the super strong Pagori breed and the hypnotically beautiful Keja breed to be too tame and human-like. Most refuse to take her seriously, especially a Pagori commander named Jared who she craves in spite of herself. The Grand High Master, however, sees her potential and offers her the position of

Jared's co-commander to help train the newest squad in time for the impending attack on his home. Sam has to demonstrate to Jared and the squad of chauvinists why it is incredibly foolish to underestimate a wilful, temperamental, borderline-homicidal Sventé female.

Warning: This novel contains an iron-willed female vampire with an energy whip, a sexist male vampire who is determined to have her, explicit vampy sex, and a romance story with real bite.

She's a lone wolf with a cause. As a volunteer at a shelter for lone shifters--the same one that rescued her--Makenna Wray has dedicated her life to finding homes for its residents. And when she discovers that a teen in her care is related to Ryan Conner, the broody, handsome-as-sin enforcer of the Phoenix Pack, she's eager to help connect the two. She just wasn't prepared to feel a connection of her own. Lone wolves are loners for a reason--and most of them bad. Or so Ryan assumes until he meets the mysterious Makenna. Quirky and sensual, she seems to enjoy riling him, especially when she refuses to discuss her past. Although there is no mating bond, he's sure she's the one. All he has to do is be patient and wait. But when another pack's sinister Alpha comes sniffing around, threatening Makenna and her shelter, this enforcer is ready to let his wolf off the leash....

Harley Vincent is resigned to life in the human world. Sure, being a margay shifter is half her nature, but life among humans gives her the freedom to roam and do as she pleases. That is, until anti-shifter extremists target her, putting her life in immediate danger. When an old

acquaintance and onetime fling, Jesse Dalton, shows up to offer the protection of his pack, Harley hesitates. She may have feelings for Jesse that go beyond their one-night stand, but life among shifters means giving over her independence to the needs of pack. Plus Mercury Pack has its own threat to face: a rich half-shifter is determined to claim their territory at any cost. Jesse, who lost his true mate as a child, has wanted Harley since their night together, and he s not letting her go again. They may not be destined for each other, but he knows she belongs to him and with his pack. Even if he can convince her to join him now, can he convince her to stay?"
