The Making of the Wren Library Trinity College, Cambridge

Nature lovers and poetry fans alike will be drawn to this lyrical picture book depicting how Carolina wrens build a nest for their young. This is the bark, snippets of twine, spidery rootlets, and needles of pine that shape the nest that Wren built. In the rhyming style of "The House That Jack Built," this poem about the care and specificity that Carolina wrens put into building a nest is at once tender and true to life. Papa and Mama Wren gather treasures of the forest, from soft moss for a lining to snakeskin for warding off predators. Randi Sonenshine's lilting stanzas, woven with accurate and unexpected details about Carolina wrens, and Anne Hunter's gentle, inviting illustrations reveal the mysterious lives of these birds and impart an appreciation for the wonder of the life cycles around us. Back matter includes a glossary and additional interesting facts about wrens.

A girl goes missing in the heart of London. A mutilated body is pulled from the Thames. A mysterious house hides dark secrets, protected by the greatest power in the land. When her daughter Katie vanishes just a few days after arriving in London, Winifred Wren immediately heads to the city. Frantic with worry, she quickly finds herself stonewalled. Katie's apartment appears to have been ransacked, with strange symbols daubed all over the walls, but the police refuse to help. And then Winifred meets Annabelle Churchill, a down-on-her-luck journalist who claims to know the truth. Soon, Winifred learns about the horrors that lurk behind some of London's doors. A mysterious house is said to hide an ancient society, and it quickly becomes apparent that Katie has been drawn into the clutches of a cult. Dark forces are gathering, and an ancient evil is about to be invoked. Meanwhile, the crows and ravens of the city are gathering, preparing for a day that was prophesied two thousand years ago. *The Disappearance of Katie Wren* is a horror novel about one woman's search for her daughter, and about the secrets that lurk in one of the world's largest cities.

This book considers Wren's 'other' career as an astronomer, and shows how science informed his architectural philosophy.

For as long as she can remember, Wren Gray's goal has been to please her parents. But as high school graduation nears, so does an uncomfortable realization: Pleasing her parents once overlapped with pleasing herself, but now . . . not so much. Wren needs to honor her own desires, but how can she if she doesn't even know what they are? Charlie Parker, on the other hand, is painfully aware of his heart's desire. A gentle boy with a troubled past, Charlie has loved Wren since the day he first saw her. But a girl like Wren would never fall for a guy like Charlie—at least not the sort of guy Charlie believes himself to be. And yet certain things are written in the stars. And in the summer after high school, Wren and Charlie's souls will collide. But souls are complicated, as are the bodies that house them . . . Sexy, romantic, and oh-so-true to life, this is an unforgettable look at first love from one of young adult fiction's greatest writers. Praise for *The Infinite Moment of Us* STARRED REVIEW "The scenes of sexual intimacy are described with innocently erotic frankness, offering an ideal (if not idealized) model for readers on the cusp; this is *Forever...* for a new generation, offering character depth Cath and Michael never achieved. Summer love has never been so good." —Kirkus Reviews, starred review "In contrast to unhealthy depictions of sex and relationships that teenagers (and adults) are often exposed to in media and entertainment, *Myracle* offers up a passionate romance built on a bedrock of love, respect, and trust. And it's difficult to see that as a bad thing." —Publishers Weekly "Two mature recent high school graduates fall in love and bring out the best in each other in Lauren Myracle's thoughtful exploration of an intimate relationship...the relationship between Wren and Charlie always remains realistic and involving." —Shelf Awareness "This charming romance has multidimensional characters, straightforward sexuality, and a pace that lets readers fall in love with the main characters. Myracle expertly captures the intense connection of first love, from the need to spend every moment together to trying to figure out how to communicate with one another." —School Library Journal "The single-focus intensity of Wren and Charlie's feelings is spot-on for the age group... chapters move between both their perspectives as they grow into the relationship, offering readers of both sexes a rather compelling example of the how-to's of intimacy." —The Bulletin of The Center for Children's Books

A unique interdisciplinary study, this book examines the British and European tradition of the wren hunt, in which a bird ordinarily revered and protected for most of the year was killed around the time of the annual solstice. In focusing on this ancient ritual, Elizabeth Atwood Lawrence draws on her training in cultural anthropology and biology to cast a fresh light on the complexities of human-animal relationships. Following an introductory chapter on animal symbolism, Lawrence proceeds in subsequent chapters to describe the wren both as a biological entity and as the subject of numerous tales and legends, to delineate the details of the wren hunt ceremony and the various meanings ascribed to it, and, finally, to relate the ceremony to important contemporary issues in human-animal interactions and current attitudes toward the living environment. Whereas most other studies tend to concentrate solely on human perceptions of animals and fail to include the animal's role in the relationship, Lawrence's approach shows how the participation of both animal and human determines the symbolic status of the animal -- which in turn influences the treatment of that animal within a particular society. At a time when human destructiveness toward nature has reached tragic proportions, Lawrence contends, it is critical that we understand the processes by which certain cultural beliefs, in combination with observations about the natural history of a particular animal, result in emotional and mental responses that may ultimately determine the fate of that species. The author argues persuasively that the wren hunt -- with its ancient roots, associated beliefs, and complex meanings in the preindustrialized world -- still has much to teach us.

This is the first volume concerned solely with the archaeology of a major late 17th century building in London, and the major changes it has undergone. St Paul's Cathedral in the City of London was built in 1675–1711 to the designs of Sir Christopher Wren and has been described as an iconic building many times. In this major new account, John Schofield examines the cathedral from an archaeological perspective, reviewing its history from the early 18th to the early 21st century, as illustrated by recent archaeological recording, documentary research and engineering assessment. A detailed account of the construction of the cathedral is provided based on a comparison of the fabric with voluminous building accounts which have survived and evidence from recent archaeological investigation. The construction of the Wren building and its embellishments are followed by the main works of later surveyors such as Robert Mylne and Francis Penrose. The 20th century brought further changes and conservation projects, including restoration after the building was hit by two bombs in World War II, and all its windows blown out. The 1990s and first years of the present century have witnessed considerable refurbishment and cleaning involving archaeological and engineering works. Archaeological

specialist reports and an engineering review of the stability and character of the building are provided.

Anne Glyn-Jones opens up the secret world of the interceptors of German Morse Code signals during World War II. Leaving her girls' boarding school with romantic ideas about joining the navy as a Wren, Anne had no idea that she would be working for the mysterious 'Station X', which we now know to be Bletchley Park. Round the clock shifts, bed bugs, rats and poor diet took its toll, as well as the ongoing lack of recognition from the Navy hierarchy. Morse Code Wrens of Station X is a very personal memoir of a young woman's experiences of war time service, as well as providing fascinating insights into the daily realities of the battle for military intelligence superiority.

Few can argue with the power of music to touch the heart. Voices shared in worshipful song allow us to honor God in a truly beautiful way. In Hymns for Today, renowned hymn writer Brian Wren helps us understand why this is so. Wren surveyed hundreds of hymns written since the 1960s to compile this discussion of forty hymn poems and to share the insights they provide for Christian faith. These contemporary hymns are analyzed for how they express Christian faith and traditional themes in fresh ways. Questions for discussion are included for each chapter, making this book an excellent group study resource. The For Today series was designed to provide reliable and accessible resources for the study and real life application of important biblical texts, theological documents, and Christian practices. The emphasis of the series is not only on the realization and appreciation of what these subjects have meant in the past, but also on their value in the present--"for today." Thought-provoking questions are included at the end of each chapter, making the books ideal for personal study and group use.

The touching and nuanced portrait of the rise and fall of Nazi Germany through the eyes of a resourceful German boy. Ludwig is an odd and introverted child, growing up in Hitler's Germany. While Ludwig's father, Wilhelm, is a senior Nazi and a true believer, Ludwig escapes the unfolding catastrophe by withdrawing into nature and books. Eventually, when the Allied bombing campaign intensifies, Ludwig is sent to a Hitler Youth camp, where his oddness makes him a target for bullying. As the war turns against Germany, the Hitler Youth camp becomes ever more severe and militaristic, and the atmosphere spirals towards chaos. After the Nazis abandon the camp, Ludwig returns home, and his father is presumed dead. With Ludwig's mother descending into depression, the 11-year-old bears increasing responsibility for the survival of the family as starvation sets in under Russian occupation. Soon, it will be impossible to leave the Russian zone, so Ludwig decides that he must rally his despondent mother and lead her and his three younger siblings in an escape attempt to the west. Based on a true story, The Willow Wren is a unique, touching exploration of extremism, resilience, and the triumph of the small.

Frank Hardy's famous novel Power Without Glory was printed and published secretly in Melbourne in 1950. The subsequent legal battle, in which Hardy was eventually acquitted of the charge of criminal libel, rivals the Em Malley hoax and the Demidenko affair as Australia's greatest cause celebre.

'This fascinating biography . . . A perfect Christmas present for any birder' Birdwatching From the BESTSELLING AUTHOR of The Robin: A Biography, STEPHEN MOSS: The wren is a paradox of a bird. They are Britain's most common bird, with 8.5 million breeding pairs and have by far the loudest song in proportion to their size. They also thrive up and down Britain and Ireland: from the smallest city garden to remote offshore islands, blustery moors to chilly mountains. Yet many people are not sure if they have ever seen a wren. Perhaps because the wren is so tiny, weighing just as much as two A4 sheets of paper, and so busy, always on the move, more mouse than bird. However if we cast our eyes back to recent history wrens were a mainstay of literary, cultural and popular history. The wren was on postage stamps and the farthing, it featured in nursery rhymes and greetings cards, poems and rural 'wren hunts', still a recent memory in Ireland particularly. With beautiful illustrations throughout, this captivating year-in-the-life biography reveals the hidden secrets of this fascinating bird that lives right on our doorstep.

Through the prism of the tumultuous life and brilliant intellect of Sir Christopher Wren, the multitalented architect of Saint Paul's Cathedral in London, historian Lisa Jardine unfolds the vibrant, extraordinary emerging new world of late-seventeenth-century science and ideas. The man behind the bold, imposing beauty of Saint Paul's was as remarkable as the monuments he has left us. Wren was a versatile genius who could have pursued a number of brilliant careers with equal virtuosity. A mathematical prodigy, an accomplished astronomer, a skillful anatomist, and a founder of the Royal Society, he eventually made a career in what he described disparagingly in later life as "Rubbish" -- architecture, and the design and construction of public buildings. Wren was a major figure at a turning point in English history. He mapped moons and the trajectories of comets for kings; lived and worked under six monarchs; pursued astronomy and medicine during two civil wars; exercised his creativity through the English Commonwealth, the Great Fire, the Restoration. His royal employment outlasted abdication, Dutch invasion, and the eventual extinction of the Stuart dynasty. Beyond the public achievements, Jardine explores Wren's personal motivations and passions. He was a sincere, intensely moral man with a remarkable capacity for friendship. His career was shaped by lasting associations forged during a turbulent boyhood and a lifelong loyalty to the memory of his father's master and benefactor, the "martyred king," Charles I. Everything Wren undertook, he envisaged on a grander scale -- bigger, better, more enduring than anything that had

gone before.

First director of the Académie royale d'architecture, François Blondel established a lasting model for architectural education that helped transform a still largely medieval profession into the one we recognize today. Most well known for his 1676 urban plan of Paris, Blondel is also celebrated as a mathematician, scientist, and scholar. Few figures are more representative of the close affinity between architecture and the "new science" of the seventeenth century. The first full-length study in English to appear on this polymath, this book adds to the scholarship on early modern architectural history and particularly on French classicism under Louis XIV and his minister Jean-Baptiste Colbert. It studies early modern science and technology, Baroque court culture, and the development of the discipline of architecture.

Most of us have a fundamental misunderstanding of love. We think it is about us. We believe it is about how someone or something makes us feel. When something or someone fails to give us the positive feeling we want, we move on and look for something else. This type of love requires little effort. By making it about us, and how we feel, we miss the many opportunities presented to us every day to have lasting and meaningful impact. To truly love is hard. It is not a feeling, but an action. It requires us to be intentional and outwardly focused on others rather than internally focused on our own feelings. When we love hard, our lives have real, meaningful, lasting, positive impact on the world around us. In Love Hard, Jason Wren uses stories from his and others' lives to show how all of us can learn to love hard and, thus, have significant and lasting impact.

Sir Christopher Wren (1632–1723) is now mostly remembered as a genius of architecture – but he was also an accomplished polymath, who only came to architecture quite late in life. Most famous as the mastermind behind the rebuilding of St Paul's Cathedral and more than fifty parish churches after the Great Fire of London, among his countless other projects Wren also designed the Royal Hospital at Chelsea, the Royal Naval Hospital at Greenwich, and much of Hampton Court Palace. Replete with colourful images of his buildings, this concise biography tells the story of a man whose creations are still popular tourist attractions to this day, but also casts light on Wren's credentials as an intellectual and a founding member of the Royal Society.
