The study provides a description of the verbal derivational suffixation, postinflectional derivation, enclitics, and particles of the Central Siberian Yupik Eskimo language as spoken on St. Lawrence Island, Alaska and on the coast of Chukotka, in the Soviet Union. It also shows how these elements participate in a network of four tightly-knit grammatical subsystems (verbal derivational suffixation; discourse enclitics; inflectional verbs moods; and adverbial and conjunctive particles borrowed from Chukchi, a neighboring Paleo-Siberian language), presents implications of the relationships among these subsystems for the theory of autolexical syntax and the theory of language change (particularly concerning contact-induced morphological and syntactic change in a polysynthetic language), and documents the history and sociolinguistics of grammatical and lexical influence of Chukchi on the Eskimo and Bering Sea area. This book presents a comprehensive study of the most famous and spectacular instance of inflation in modern industrial society--that in Germany during and following World War I. A broad, probing narrative, this book studies inflation as a strategy of social pacification and economic reconstruction and as a mechanism for escaping domestic and international indebtedness. The Great Disorder is a study of German society under the tension of inflation and hyperinflation, and it explores the ways in which Germany's hyperinflation and stabilization were linked to the Great Depression and the rise of National Socialism. This wide-ranging study sets German inflation within the broader issues of maintaining economic stability, social peace, and democracy and thus contributes to the general history of the twentieth century and has important implications for existing and emerging market economies facing the temptation or reality of inflation.

This book, a tribute to Angela Downing, consists of twenty papers taking a broadly functional perspective on language, with topics ranging from the general (grammar as an evolutionary product, text comprehension, integrative linguistics) to particular aspects of the grammars of languages (Bulgarian, English, Icelandic, Spanish, Swedish). The more specific papers are sequenced according to Halliday's division into ideational, textual and interpersonal aspects of the grammar, and cover a wide range of areas, including aspect, argument structure, noun phrase/nominal group structure and nominalisations, pronominal clitics, theme in relation to writing skills, discourse structures and markers, the role of attention in conversation, the functions of topic, phatic communion, subjectification, formulaic language and modality. A recurrent theme in the volume is the use of corpus materials in order to base functional descriptions on authentic productions. Overall, the volume constitutes a panoramic but nevertheless detailed view of some important current trends in functional linguistics.
